## Assignment: Primate Behavior Lab Activity

### Instructions

#### **Objectives**

In this week's lab video, various examples of primate behavior were demonstrated to you. Now is your chance to identify those behaviors yourself, using additional video clips of primates and other animals.

#### **What To Do**

Watch the following four video clips. In the video clips, you will see the behaviors of at least 2 different primates and 2 different non-primate animals. After, you will write a short summary of your observations that covers the following:

- What are the primate behaviors you observed in the video? Describe.
- Compare the behaviors between the different primates. How do they differ and how are they similar?
- Compare the primate behaviors with those you saw of the non primate animals.

Your summary should be approximately one page (*single-spaced, 12 pt. font*) long.

#### **Behavior Video Clips**

0:00 / 1:10

## Grading and Evaluation

To see how your work will be evaluated, view the rubric below.

## Submission Instructions

Submit your work to this assignment by clicking the "Submit Assignment" button and uploading your summary as a .doc or .docx file. Be sure to hand in your assignment by the due date and time listed in Canvas.

## Primate Behavior Lab Activity Rubric

Criteria	Ratings				Pts
Check your knowledge of primate behavior	<b>8 pts Exceptional</b> Student correctly named and described four types of primate behavior	<b>6 pts Acceptable</b> Student correctly identified two types of primate behavior	<b>4 pts Unacceptable</b> Student correctly identified just one type of primate behavior	<b>0 pts No Marks</b> No attempt to identify primate behavior	8 pts
Demonstrate your ability to compare and contrast behavior between different species of primates	<b>8 pts Exceptional</b> Student compared behavioral differences and similarities for two pairs of primates	<b>6 pts Acceptable</b> Student compared behavioral differences and similarities for one pair of primates	<b>4 pts Unacceptable</b> Student was unable to correctly identify significant differences OR similarities between any primates	<b>0 pts No Marks</b> No attempt to compare or contrast behavior between primates	8 pts
Demonstrate your ability to compare and contrast primate behavior with that of non-primate mammals	<b>8 pts Exceptional</b> Student compared behavioral differences and similarities for two pairs of animals	<b>6 pts Acceptable</b> Student compared behavioral differences and similarities for one pair of animals	<b>4 pts Unacceptable</b> Student was unable to correctly identify significant differences OR similarities between any animals	<b>0 pts No Marks</b> No attempt to compare or contrast primate behavior with that of non-primates	8 pts
<b>Total Points: 24</b>
