Class Assignment Guidelines

Posted on: Tuesday, April 13, 2021 9:37:58 AM CDT

Hello Class,

Please note that you have an individual assignment to do in this course. Each student works on their own assignment worth 20 points and due at the end of the semester on **Friday May 14**. Submission link will be available in the "Assignments" folder.

- Each student is free to select any topic covered in Modules 5-9 (Equipment, procedures, technologies or methodologies) and do a research on recent developments, advances or applications of that specific topic.
- The submitted assignment can be in any format you prefer including a written report (max 5 pages), or PowerPoint slide set (max 15 slides), or a recorded talk by yourself (4-5 min clip) which can be recorded and uploaded easily using Yuja via Blackboard.
- It is highly recommended that you review the notes on "Technical Report Writing" and "Presentation Skills" in the "Soft Skills" module for guidelines on how to prepare your report or presentation slides, before you submit your assignment.
- Only use reliable resources such as peer reviewed papers and published reports by authorized organizations, to find the information you require for the assignment.
- Also, do not forget to cite any resources you use in your assignment.

Please let me know if you have any questions.
