

6. A supply and demand puzzle

The following graph shows the market for laptop computers in 2012. Between 2012 and 2013, the equilibrium quantity of laptop computers remained constant, but the equilibrium price of laptop computers increased. From this, you can conclude that between 2012 and 2013, the supply of laptop computers _____ and the demand for laptop computers _____ .

Adjust the graph to illustrate your answer by showing the positions of the supply and demand curves in 2013.

Tool tip: Click and drag one or both of the curves. Curves will snap into position, so if you try to move a curve and it snaps back to its original position, just try again and drag it a little farther.
