| Deliverable | <p>Conduct a literature review in Information Technology Strategic Planning.</p> <p>You can also conduct a literature review on Strategy and how it is applied to an Information Technology organization.</p> <p>You are to review the literature on Information Technology Strategic Planning and discuss problems and gaps that have been identified in the literature. You will expand on the issue and how researchers have attempted to examine that issue by collecting data – you are NOT collecting data, just reporting on how researchers did their collection.</p> <p>As you read the literature, it will become apparent that there are multiple issues, pick one issue that stands out in the literature.</p>                                                                                                                                                                                                                                                                                                                                     |
| Format      | <p>Cover:<br/>Include the names of those who participated in the project</p> <p>Table of contents:<br/>Use a Microsoft Enabled Table of Contents feature.</p> <p>Background:<br/>Describe the issue, discuss the problem, and elaborate on any previous attempts to examine that issue.</p> <p>Research Questions:<br/>In your identified problem area that you are discussing, what were the research questions that were asked?</p> <p>Methodology:<br/>What approach did the researcher use, qualitative, quantitative, survey, case study?<br/>Describe the population that was chosen.</p> <p>Data Analysis:<br/>What were some of the findings, for example, if there were any hypotheses asked, were they supported?</p> <p>Conclusions:<br/>What was the conclusion of any data collections, e.g., were research questions answered, were hypotheses supported?</p> <p>Discussion:<br/>Here you can expand on the research and what the big picture means, how do the results found in the literature review help organizations in the Information</p> |

|                                               |                                                                                                                                                                                                                                                                                                                                         |
