

# Project Part 3 ▾

- **Part 3 (Week 7)**

- Think about how the information you've gathered applies to the case study (inspirations or cautionary information) and how you could apply it to the local population
- Brainstorm at least five ideas and possible solutions. Write them down. Draw sketches.
- Remember: you should keep all of your notes or other documents as you work on the project - you need to submit these as evidence of your work at the end of the project.
