

This assignment is an individual assignment.

Support your submission with course material concepts, principles, and theories from the textbook along with few scholarly, peer-reviewed journal articles.

Use Saudi Electronic University academic writing standards and APA style guidelines, citing references as appropriate.

Submit your findings in a 3–4-page document, excluding the title page, abstract and required reference page, which are never a part of the minimum content requirements, in the Assignment Dropbox.

It is strongly encouraged that you submit all assignments to the Turnitin Originality Check (available under Information folder on your Blackboard) prior to submitting them to your instructor for grading. If you

are unsure how to submit an assignment to the Originality Check tool, review the Turnitin Originality Check – Student Guide for step-by-step instructions.

## **Assignment-IV: Provisional Questions for data collection**

### **(Questionnaire) (60 points)**

By this time, you will have a good knowledge of data collection techniques and the measurement questions and instruments. Develop a good questionnaire based on the chapters from the textbook (module 5-10). The questionnaire must have all types of questions you studied in the chapters, e.g., Dichotomous (Yes/ No), Multichotomous (MCQ), Check List, Ranking & Rating Scale as well as Open-ended questions. Minimum 20 questions should be included in the questionnaire

(mentioning the type of question). The logical sequence must be maintained, and the ideal format and basic guidelines must be adhered.

**NOTE : The Questionnaire must be based on the literature review we did before.**

I will post it.
