

Learning Outcomes

By the end of this Module you will be able to:

- Formulate an answerable research question arising from clinical practice and justify the choice of question based on current policy and practice (Assignment 1)
- Undertake a targeting and efficient search to identify available best evidence, and justify the choice of best evidence (Assignment 2)
- Critically appraise the research or review using an appropriate framework (Assignment 2)
- Evaluate the extent to which the results/findings are generalisable to the client group and context, and fit with other sources of knowledge (Assignment 2)
