

Care Plan

Course: NUR4641-01:Adult Health Nursing II (2022 Spring Term 1)-14350

Criteria	Good - 3 pts 3 points	Fair - 2 pts 2 points	Poor - 1 pt 1 point	Incomplete - 0 pts 0 points	Criterion Score
Patient Information and health assessment Complete patient demographics, health assessment and interventions	All of the demographic section is completed, all areas of the health assessment is completed interventions are identified for the health assessment data that is identified.	Approximately half to 2/3rds of the demographic section is complete. The health assessment is at least half complete and is accurately identified although minimal interventions are still noted based on the health assessment dated gathered	Minimal demographic information is provided in the care plan, many areas of the health assessment section are omitted, interventions are limited.	No Demographic information is noted in the care plan, health assessment and interventions are not identified correctly.	/ 3
Number of Nursing Diagnoses Provided 5 correct nursing diagnoses for the patient based on the patient health assessment, history, labs, and pathophysiology.	Patient has identified 5 nursing diagnoses for the patient that are correct based on the patient assessment, history and data	Patient has identified 4 nursing diagnoses for the patient that are correct based on the patient assessment, history and data	Patient has identified 3 nursing diagnoses for the patient that are correct based on the patient assessment, history and data	Patient has identified 2 nursing diagnoses for the patient that are correct based on the patient assessment, history and data.	/ 3

Criteria	Good - 3 pts 3 points	Fair - 2 pts 2 points	Poor - 1 pt 1 point	Incomplete - 0 pts 0 points	Criterion Score
Pathophysiology: Disease process description including "Signs and Symptoms" as well as APA references cited	Explanation of pathophysiology chosen; given with accurate details related to client's symptoms and current illness. APA references noted	No explanation of pathophysiology chosen; given with accurate details related to client's symptoms and current illness. APA references noted	No explanation of pathophysiology chosen; given with accurate details related to client's symptoms and current illness. No APA references noted	Not identified correctly or correctly identified although with many omissions noted. The pathophysiology is not integrated into the plan of care	/ 3
Pharmacology : Complete and accurate description of current medication list that includes description of medications, side effects as well as nursing considerations specific to the patient	List all MAR meds with description, side effects and nursing considerations specific to patient and why patient is receiving drug	Most of the MAR meds with description, side effects and nursing considerations specific to patient and why patient is receiving drug	List some MAR meds but does not include relevant side effects and nursing considerations specific to patient	Only some of the current meds are written & discussed in the meds section. Info is incomplete with many omissions noted. The meds are not integrated in the plan of care	/ 3

Criteria	Good - 3 pts 3 points	Fine - 2 pts 2 points	Poor - 1 pt 1 point	pts 0 points	Criterion Score
Nursing Diagnosis: (Includes all 5 Dx) Reflects the primary diagnosis and is appropriate for patient scenario as well as priority level. Expressed in acceptable NANDA format. Also includes all parts stem, R/T, and AEB	Diagnosis is appropriate for patient/priority level. NANDA approved. Diagnosis also includes all parts and information	Diagnosis is appropriate for patient/priority level. NANDA approved. Does not include all parts or info is listed in wrong part of diagnosis	Diagnosis is not appropriate for patient and priority level. May also not be NANDA approved and may not include all parts	Diagnosis selected reflects that no effort to interpret info was applied resulting in a flawed plan of care. NANDA format is not complete or used correctly	/ 3
Assessment: Appropriate for chosen diagnosis. Includes objective & subjective historical data that support actual or risk for nursing diagnosis	Includes all pertinent data related to nursing Dx., and does not include data that is not related to Dx	Includes all pertinent data related to nursing Dx., but also includes data not related to Dx	Doesn't include all pertinent related data to nursing Dx. May include data not relating to Dx	Not all relevant subjective & objective data is collected. There is an absence of the use of inquiry to collect info relevant to the individual's disease & circumstances.	/ 3

Criteria	Good - 3 pts 3 points	Fair - 2 pts 2 points	Poor - 1 pt 1 point	Incomplete - 0 pts 0 points	Criterion Score
Patient Outcomes: Outcomes should be specific to the patient Dx., The outcome statement should also contain the following 4 criteria: measurable, attainable, realistic, and timed. All criteria should be present to be a specific patient expected outcome	Outcomes statement is specific to pt. Dx. and contains all 4 measurable criteria	Outcomes statement is specific to pt. Dx. and it only contains two of the 4 measurable criteria	Outcomes statement is not specific to pt. Dx. and it only contains 1 of the 4 measurable criteria	Some of the outcome criteria identified to achieve goals will lead to the resolution or control of the related factors and purely based on coincidence	/ 3

Criteria	Good - 3 pts 3 points	Fair - 2 pts 2 points	Poor - 1 pt 1 point	Incomplete - 0 pts 0 points	Criterion Score
Intervention/Implementation: Include Interventions or nursing actions that directly relate to the patient's goal; are specific in action, frequency & contain rationale. The number of interventions should be appropriate to help patient/family meet their goal	Interventions portion contains adequate # of interventions to help pt./family meet goal, and interventions are specific in action and frequency, and are listed with rationales	Interventions portion contains adequate # of interventions to help pt./family meet goal, but may not be specific, labeled or listed with rationales	Intervention portion doesn't include adequate # of interventions to help pt./family meet goal. May also not be specific, labeled or listed with rationales	Inappropriate Interventions are included in the plan of care. Interventions are not realistic & appropriate to the patient's current status	/ 3

Criteria	Good - 3 pts 3 points	Fair - 2 pts 2 points	Poor - 1 pt 1 point	Incomplete - 0 pts 0 points	Criterion Score
Evaluation: Includes all data that is listed as criteria in goal statement. Based on this data, goal is determined to be met, partially met, or not met. If goal was not met or partially met, plan of care is revised or continued & a new evaluation date/time is set	Evaluation portion does contain data that is listed as criteria in goal statement. Does describe goal as met, partially met or not met. If goal partially met or not met, includes revision and or a new evaluation date time	Evaluation portion does contain data that is listed as criteria in goal statement but does not describe goal as met partially met or not met. May also not include a revision or new evaluation date/time	Evaluation portion does not contain data that is listed as criteria in goal statement. May also not describe goal as met, partially met or not met. May also not include revision or new evaluation date/time	Does not clearly evaluate if the outcome is met; evaluation is purely based on if interventions are applied to patients care	/ 3
