

Critical Thinking Assignment 2: Module-3 & 4

Deadline: End of Week 5

Regulations:

This assignment is an individual assignment.

Support your submission with course material concepts, principles, and theories from the textbook along with few scholarly, peer-reviewed journal articles.

Use Saudi Electronic University academic writing standards and APA style guidelines, citing references as appropriate.

Submit your findings in a 3–4-page document, excluding the title page, abstract and required reference page, which are never a part of the minimum content requirements, in the Assignment Dropbox.

It is strongly encouraged that you submit all assignments to the Turnitin Originality Check (available under Information folder on your Blackboard) prior to submitting them to your instructor for grading. If you are unsure how to submit an assignment to the Originality Check tool, review the Turnitin Originality Check – Student Guide for step-by-step instructions.

Assignment-II: Literature Review (60 points)

Subject : How the increased reliance on hybrid teams effects on a project management

Once the topic and the draft questions are finalized, various aspects related to the

topic should be explored. For this purpose, visit Saudi Digital Library website and download at least 15 research articles (at least 5 articles must be published in last 5 years) related to the topic and draft research questions. Prepare the Literature review as per the sample format provided in the blackboard (available in Week 3 course materials) (already included in this document). The topic must be supported by quality literature. Similarly, the individual questions (objectives), which will be converted to hypotheses, must derive support from latest and relevant literature.

My professor feedback on the first assignment:

I recommend the following: refine your topic: Indicate accurately the subject and

scope of the study, by identifying key variables and links.

Refining research questions with additional reading and exploration will be helpful to determine the concepts, variables and links. It will lead to the development of investigative questions and hypothesis test.

Your literature review, will further orient you to better understand your topic and especially, identify the variables that you will study.
