

**This is a graded discussion: 10 points possible**

due Aug 6

## Discussion #4: The Future?

20 20

In your final post in this class, I'd like to share your perspective on the future of *Homo sapiens*. We've covered millions of years of the history of our kind; what do you think the future holds? Will we adapt to the planet that we are changing? Will we slow down, alter, or redirect some of the changes that have begun under our watch? Are you optimistic...or not? Why?

- Please submit **one original post** of at least 250 words and a minimum of **one thoughtful response** post to another student for full credit.
- While you may reference broader current issues, be sure to illustrate that you've reviewed the materials from the modules.
