

DISCUSSION ONE:

This group will focus on the symptoms of aphasia for your initial discussion post. Each member of the group should pick one type of aphasia (e.g., Wernicke's aphasia, conduction aphasia, anomic aphasia, etc.) and describe the symptoms, underlying brain structures involved, and at least one common etiology. Your discussion should also include at least one peer-reviewed article on some type of research study involving the type of aphasia you have
