

Week 4: Team Discussion: Outlining Your Project

19 26

This week, you will work with your team to develop a collaborative and cohesive outline for your team paper. To get started this week for your initial post, provide a summary of your section and an outline that details the following.

- Main idea
- Key points of evidence
- Preliminary analysis of evidence
- Conclusions and recommendations
- References

This will help your team highlight similarities and differences in content and structure to begin conversations about streamlining content and project design.
