

What is one take away from this course?

You have made it through 8 weeks of remote instruction in the tail end of a pandemic.. You have gone through an entirely online class, most of you as your first College Course. There has been many items discussed in the class. You may choose to talk about the content of the course, social injustice, privilege, systemic racism, BLM movement, Police brutality, George Floyd, Segregation, redlining. Or you may choose to talk about the mechanics of writing, MLA format, Thesis, Main Claims, Sub Claims, finding information, formatting quotes, writing paper #1, #2, #3 or #4. You have 3 things to accomplish in only 300 words:

- What part of the class did you like the least and what does that say about you?
- What is one thing that you can take away with you from this course regarding any aspect mentioned above?
- What do you want to tell the Me (David) about how to improve the course?
