

4. Suppose there are only two small countries in the world: Ascot, with a population of 30,000 people, and Delwich, with a population of 20,000 people. Ascot's GDP is equal to \$150 million, while Delwich's GDP is \$250 million. Delwich's GNP has been estimated to be equal to \$280 million. Use this information to calculate Ascot's GNP, the GDP per capita in Ascot, and the GNP per capita in Delwich.
