

SERVICES OVERVIEW

Pinnacle Treatment Centers is on a mission to make recovery possible by transforming lives, communities and the families we serve with treatment that works. In Virginia, we provide a range of outpatient treatment options including medication-assisted treatment and counseling for drug and alcohol addiction to help our patients and their families reclaim their lives and future. Treatment is individualized based on a clinical assessment of each patient's needs.

About Medication-Assisted Treatment

Methadone is the most successful medication-assisted treatment for opiate addiction. The National Institutes of Health confirms that Methadone Maintenance Treatment effectively reduces illicit opiate drug use, reduces crime, enhances social productivity, and reduces the spread of viral diseases, such as AIDS and hepatitis.

Buprenorphine (Suboxone) reduces the cravings of addiction to opioids while reducing the discomfort of withdrawal symptoms and, unlike methadone, can be prescribed in a doctor's office. Our comprehensive Suboxone Maintenance Program includes medical intervention and treatment for long-term opiate addiction.

Vivitrol monthly injections of long-acting Vivitrol (Naltrexone) are offered after detox. Scientifically proven to reduce opioid cravings and prevent relapse to heavy drinking for alcoholics, it is covered by many prescription plans.

Must be over 18, be using heroin, opiates or other narcotic substance for a period of one year or more. We accept self-pay at reasonable weekly rates, with discounts available for spouses and/or family members. Ask about our referral program. We also accept Medicaid and are part of the Work First Self-providers network. Same day screenings available for immediate admission.

WE'RE HERE

If you or someone you know is struggling with addiction, Pinnacle Treatment Centers can help. Our evidence-based, medically-assisted treatment methods make a lasting recovery possible. In Virginia, we offer outpatient programs, medically-assisted detox, and other individualized treatment plans to help transform lives, families, and communities we serve.
