think of when you think of the National Rifle Association (NRA)
e? charitable? No, they are not.

San Francisco City Council passed a resolution to list the National
"domestic terrorist organization in the United States" and called on all
ment to adopt the same position.

Diana Padilla Legaspi
I think it would be better to leave it
as an open ended question where
readers decide at the end.

quick tips:

- you talk very broadly about the NRA, but you don't actually investigate the discourse of people within the community
- it also doesn't really have an angle- it reads like a report, not like a Vice News story

- you don't have any primary sources

I suggest taking a look at the genre examples to get a better sense of what you should be doing.

the goal of the organization was: "Scientifically and effectively improve shooting skills."

The problem with the NRA is that they support the Second Amendment to the Constitution of the United States Bill of Rights, but they over-interpreted this bill, that citizens have the right to hold guns, but the frequent occurrence of shootings is not a reason to prohibit the possession of guns. Its long-term position "cannot stop criminals by prohibiting firearms, you stop criminals by stopping criminals."

Diana Padilla Legaspi
The phrasing makes it sound like it's a problem to support the second amendment. (Might turn away readers). I think it would be better said "The NRA's over-interpretati [...]"
