

The paper will address the question: What relationship does this piece of media have with religion? Some things to think about might be: is this religion in or as popular culture? Popular culture as religion? Religion and popular culture in dialogue? What does religion look like in this example? How does the form of popular culture/media influence how religion functions here? The goal of the paper will be to reflect on your experience and the knowledge gained through the course to analyze a piece of media of your choice. Be sure to have a clear sense of what the main point of your analysis is and organize your entire paper around this core idea.
