

According to APA, the bold titles such as "Review of systems" should be indented left and not in the middle. In your second page you should add a "Health History" (unbolded) in the center of the page and that is your title.

Under Patterns of healthcare, you want to include if your patient actively participates in preventative care such as annuals or going to the dentist, etc.

Remember to include identified risk factors and any health promotion activities. Also include what suggestions to made to their diet and what their evaluation of their own diet (excellent, good, fair, poor).

If you have any questions, please do not hesitate to contact me.
