

MANAGING AND LEADING IN BUSINESS

Neuroticism:

Openness: curious, original, intellectual, creative

You scored **moderately low** on openness (28 out of 50).

You probably prefer a balance between old and new ways of doing things but tend to lean more toward traditions. You're more practical than creative. And while you are sometimes open to new experiences, such as trying exotic foods, you still have some initial skepticism or resistance to big changes.

Conscientiousness: organized, achievement-oriented, dependable

You scored **moderately high** on conscientiousness (35 out of 50).

You are likely described as responsible and reliable. You value routines and structure because you recognize that they help keep things on track. However, you're also willing to cut others some slack; although you have high standards, you don't expect absolute perfection at all times. You give yourself time to relax and have fun—occasionally.

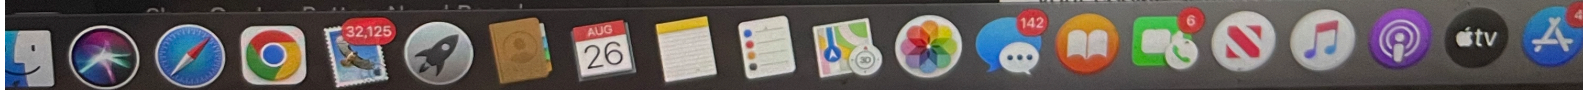

Extraversion: outgoing, talkative, sociable

You scored **moderately low** on extraversion (29 out of 50).
