

Model 2: Pharmacy Access Improvement Model

1. Objectives

- Enhance access to essential healthcare services in pharmacy deserts.
- Develop sustainable pharmacy service models tailored to underserved areas.

2. Research Questions

- What are the healthcare needs of communities in pharmacy deserts?
- How can the current pharmacy model be adjusted to better serve these areas?
- What partnerships and resources are necessary to implement these changes?

3. Methodology

- Needs Assessment: Conduct surveys and focus groups to identify healthcare needs.
- Data Collection: Gather data on existing pharmacy services and gaps in service.
- Model Development: Design a revised pharmacy service model. ()
- Partnership Building: Engage with local governments, NGOs, and healthcare providers.
- Implementation Plan: Develop a phased implementation plan for the new model.

4. Activities and Timeline

Activity | Timeline

-----|-----

- Define scope and objectives | week 1
- Conduct needs assessment | week 2
- Data collection | week 2-3
- Analyze data | week 4
- Develop revised model | week 5
- Build partnerships | week 6
- Develop implementation plan | week 7
- Pilot revised model | week 8
- Monitor and evaluate | week 9
