

Choose one of the assessments

Week 8: Discuss any problems or issues within the field of personality assessment

Test Critique Papers: These will be listed under Paper Assignments Tab

1-2 pages in length. You can choose one test that was studied that week and critique it. These will be due weeks 3-7. You need to discuss the description and purpose of the instrument, the population it was designed to assess, the results that it will provide, and interpretations that can be made from those. The papers MUST follow APA format. (Points will be deducted for failure to adhere to APA guidelines.) You are certainly able to use outside research sources in addition to your textbook. Your paper will go through Turnitin.com as you submit it under the tab in Blackboard. AI generated work will not be accepted. Do not use Grammarly as it will often flag your work as AI. The same is true for the newest version of Word. Let these papers be your own work completely
