

1. Welcome!

Creating Sanctuary in an organization is a process. However, as the results begin to unfold, an organization evolves into a community where commitments to emotional intelligence, non violence, social responsibility, growth and change, open communication, shared governance, and social learning are part of the culture.

We will be asking you to help us assess the progress in creating Sanctuary at your facility by filling out surveys like this, once a year, over the next two years. Completing this survey may take you anywhere from 10 to 15 minutes and we appreciate the time you take to fill it out.

Your responses to these questions are, and will remain, confidential. Please do not put your name on this survey. All responses will be examined and shared in aggregate - meaning we will not share any individual's personal answers, but everyone's answers together.

After completing the survey, you will not be able to enter additional responses.

If you have any questions regarding this survey, please feel free to contact your facility's Sanctuary Model Coordinator, Name, Phone, E-mail address.

Thank you.
