

Group #:

Name:

Instructions: Complete these activities on your own before IPE Module 2 begins. You will be using your notes from this in other activities during the session. Write your name and group number – you will be submitting this worksheet for evaluation. Three important keywords in TEAMWORK are *dynamics*, *integration*, and *accountability* – please keep these in mind and how they relate to each role while working through these activities.

Activity One – Professionalism, Professional Identity and Self Reflection

How can your intended profession's responsibilities and standards (both practical and ethical) contribute within the healthcare team?

Activity Two: Importance of Teamwork

Why is teamwork so important in medicine? Focus on why dynamic approaches, skills integration, and accountability play such vital roles. Summarize your thoughts.

Activity Three: Professional identities - roles and responsibilities

Think about the different members of a medical team and fill in the table with what you feel are the main responsibilities of each role.

Role	Key Elements/Responsibilities of Role
Pharmacist	
Physical Therapist	
Physician Assistant	
Physician	
Nurses	
Patient/Patient's Advocate
