

Question 1

Tries remaining: 3

Marked out of 1.00

The Mighty Machinery Company subscribes to the Healthy Family Medical Organization. Monthly insurance premiums are: employee without dependents, \$350; employee with one dependent, \$450; employee with multiple dependents, \$550.

The Mighty Machinery Company pays a large part of the premiums for participating employees and their dependents. Participating employees have deducted from their paychecks every month \$40 from an employee without dependents, \$80 from an employee with one dependent, and \$100 from an employee with multiple dependents.

The Healthy Family Medical Organization has a deductible of \$300 per year for an employee with no dependents, \$450 per year for an employee with one dependent, and \$600 per year for an employee with multiple dependents. The organization pays 80% of all medical bills in excess of the deductible.

An employee with 3 dependents participates in the company health plan. Referring to the information above, compute the amount deducted from the employee's wages in one year.
