

Maryland's Pharmacists: Improving People's Health

By 2032, the U.S. could see a shortage of as many as 55,200 primary care physicians. Even if nurse practitioners and physician assistants are fully utilized, patient needs will not fully be met.¹

Maryland has 47 designated HPSAs and only 55% of the primary care needs in those areas are currently being met.² There are 5,310 highly trained pharmacists in MD who are ready to provide valuable healthcare services.³

Meeting Patients' Needs in Maryland

6
Million
people⁴

more primary
care providers
are needed⁵

5,310
Pharmacists
ready to help⁶

Diabetes

Diabetes is a complex condition that is often managed by multiple medications. Pharmacists can optimize care and help patients understand their medications and their condition in order to improve outcomes and avoid complications.⁷

Cardiovascular Disease (CVD)

For patients with uncontrolled high blood pressure, waiting even two months to optimize medications increases the risk of complications, including hospitalizations. Pharmacists are highly accessible members of the care team who significantly improve blood pressure control and can provide timely follow-up and monitoring to improve outcomes.⁸

57%
of Maryland
residents were
vaccinated for
the flu¹⁰

Immunization rates across the U.S. have continued to increase since pharmacists began vaccinating.¹¹

14%

of people in
Maryland smoke
cigarettes¹²

Smoking causes nearly 1 of every 5 deaths in the U.S. each year.¹³ Pharmacists are qualified and capable of providing smoking cessation counseling.

50% of people with chronic diseases do not take their medicines correctly.¹⁴

Medications are critical for the treatment of chronic conditions. Pharmacists can help patients use them safely and effectively to avoid medication related problems.

Maryland spends **\$6,655,825,064** annually on prescription medications.¹⁵

Investing in pharmacists' services optimizes the use of those prescription medications. Decades of research have proven the value of including pharmacists on healthcare teams. Improved health outcomes, lower costs, and increased access to care could be a reality for Maryland residents if pharmacists were fully empowered to serve as patient care providers.

90% of the nation's \$3.5 trillion in annual health care expenditures are for people with chronic and mental health conditions.¹⁶

On average
\$1,000
per patient per
year is saved

with pharmacist
interventions for patients
with chronic conditions.¹⁷

Pharmacists' counseling and
adherence programs can
save the healthcare system

in the 6 months following
the start of a new
prescription medication.¹⁸

Pharmacists are
accessible. 93% of
Americans live
within 5 miles of a
community
pharmacy.¹⁹

Up to
30%

of Emergency
Room visits are
non-urgent.

Pharmacist
prescribing for minor
ailments can relieve
pressure on
Emergency Rooms.²⁰

Oregon pharmacists wrote
10% of all birth control
prescriptions since a
landmark law was passed.
Maryland pharmacists
could do this too!

Maryland spent
**\$11.5 billion on
Medicaid in
2018.**²²

\$4.40

saved per \$1 spent
on pharmacists'
services²¹
