

## Project for MCO 409 (Research Paper)

- Project checkpoint will be on April 5, 2023
- Final Project due April 26, 2023

For the project, you will have two deliverables when you turn in the assignment. The project is very time consuming and will require prior much research. Please **DO NOT WAIT UNTIL THE LAST WEEK TO COMPLETE THIS ASSIGNMENT.**

**NOTE:** As a matter of assessing your progress, I will create an assignment (~~03/28/2021~~) during the semester for you to submit your outline with your research topic to make sure you are on the right path.

For this assignment, you will write a (7-10) page paper from a DOD and Private security practitioner (government and private industry) perspective on information and cyber warfare. Bottom line, the topic for this project relates to cyber-warfare, information warfare, and information weaponries. You are to write your paper in from the perspective of how a DoD (government) and Private Industry cybersecurity practitioners approach cyberwarfare and information warfare, and information weaponries to defend their organizations. I highly recommend you RESEARCH this topic to put into an acceptable outline, which will help you develop a quality research paper.

### There are TWO deliverables to this project.

1. Your outline in a Word file (due at the Project checkpoint ~~03/28/2021~~), and (final submission on ~~04/18/2021~~) 4/5/23 4/26/23
2. A Word document for your final research paper. (due at final submission on ~~04/18/2021~~) 4/26/23
