

You can print out your methods section and simply attach it to this worksheet

OR ELSE You can fill in below by listing bullet points of what you're planning for your methods

A. Experimental Design (what methods you'll do; timeline or duration of experiment)

- tables
- graphs
- subheadings of what will be experimented

B. Experimental details (include how many subjects or the sample size)

What's your control group vs your experimental groups? What's your independent vs. dependent variable?

sample size: 40 or 75 to 100

control: healthy people

experimental: dementia/Alzheimer's disease

C. Plan for Anticipated Data Collection (what kind of data do you expect to acquire and how will you handle it? what statistical analysis will be used?)

not sure

D. Safety/Ethical Considerations

Hazardous material/chemicals (which?) _____

Are you working with humans?

essential oils

Are you working with animals (if so, what kind?)
