This volume arises from a workshop entitled *From Static Data to Dynamic Processes: New Perspectives on Minoan Architecture and Urbanism* held at the University of Toronto, 5–6 January 2015. The organization of the workshop was made possible by the generous financial support of the Social Sciences and Humanities Research Council (SSHRC—Canada), the Fonds National de la Recherche Scientifique (FNRS—Belgium), the ARC 'A World in Crisis' (Université catholique de Louvain, Belgium), and the Institut des Civilisations, Arts et Lettres (INCAL/UCL—Belgium). Invaluable help was also provided by the Department of Art and the Archaeology Centre (University of Toronto). We would like to thank all the speakers at this workshop for enthusiastically accepting our suggestion to gather their contributions in an edited volume and for being so professional in promptly converting their oral papers into written chapters. We are also extremely grateful to Georgie Leighton, Céline Louasli, Clare Kennedy, and Tom Perridge, at Oxford University Press, who all have been incredibly helpful and accommodating. This volume forms part of Quentin Letesson's Marie Sklodowska-Curie IOF project *NetUrbIn* funded by the European Union Seventh Framework Programme ([FP7/2007-2013] [FP7/2007-2011]) under grant agreement no. PIOF-GA-2012-326640.
