Research Proposal: Children at war.

(Impact of war against terrorism and extremism on children that leads a child to depression.)

Everything has adverse effect on life of Human beings. The excess of everything is bad because when people are not able to achieve by their self, they tend to snatch it from others. It is rule of nature that powerful always have full control over other, who are weak and not capable of take care their self and their belonging as well. Globalization have brought people and countries come closer to each other. On one hand where there are many benefits connected with it, on the other hand there are many disadvantages of it as well. The closeness among the countries sometimes leads to destruction because powerful countries when analyze other countries abilities they try to snatch their resources and want to have full command on their resources. The illegal takeover on other countries leads to massive destruction ad create an environment of war. This is not the only consequence of war, but terrorism is also an important factor that cannot be ignored. The war against terrorism and extremism have most adverse and deadly effect on life of people that not only effect the life of man, woman but have bad impression on children as well. The children who suffer from this trauma remain present in them throughout their life.

Clarify your topic - is this about children?

intro is vague - Clarify how this is a childrent issue
