

Worksheet #6

Start Assignment

Due Tuesday by 11:59pm **Points** 2 **Submitting** a file upload

File Types pdf, doc, and docx

Complete this assignment and submit it here by the due date. Just a reminder that you will lose 5% for each day it's submitted late. Enjoy!

Instructions: Pick one of the three empirical articles we've discussed so far in class and answer the following questions. Answer the questions in **complete sentences, using APA style** for all numbers presented. Then, use this worksheet as a guide when you're writing the results section of your Article Review Paper. The goal of this assignment is to demonstrate competency with writing Numbers in APA Style. Therefore, you are strongly encouraged to review those slides ↓ (https://lynn.instructure.com/courses/17478/files/2762045/download?download_frd=1) before attempting this assignment. Remember, you'll need to use these numbers in your Article Review Paper, so please take this seriously. This is not busy work!

1. How many participants were there in your study? How many males were there? How many females were there?
2. What was the average age of the participants?
3. Answer ONE of the following.....
 1. If your study was experimental, how many experimental conditions (groups) were there in your study?
 2. If your study was correlational, how many variables were measured in your study?
4. Describe ONE result from your study. Which statistics (actual numbers) represent this result?
