APARTMENT ASSESSMENT

Progress: 100%

Time Spent: 47 mins

Category	Name	Rationale	Care Plan
Environmental	Opened windows	A child might climb on the window and fall	Windows remain closed when babies are playing around
Environmental	Open doors	rats running around the house might cause disease	The doors should be closed most of the time
Health	Drugs or oil/lotion containers on cupboards	A child might consume these chemical	Drugs and lotions should be put on elevated counters
Health	Trash on the floor	brings in insects and mice which ,might cause disease	All trash should be collected and place in a closed tras can
Safety	EXTENTION CORDS	Child can play with the cord, very dangerous	Plan to bury extension cords under the rugs/carpets
Safety	tables and stools all over the place	A child might stumble and fall	Tables and stools put aways from areas where children play

NURSING DIAGNOSIS

Progress: 100%

Time Spent: 1 hr 51 mins

ANALYSIS

Nursing Diagnosis

Risk for falls
Risk for injury

Community Health Nursing Diagnosis

Risk for environmental hazard R/T knowledge deficit

Expected Outcome

In the next 2 weeks family should be free from environmental hazard

PLANNING

How will the nurse evaluate if goals/outcomes are achieved?

By following up with the family and see that chairs, tables and stools are well placed in the apartment

IMPLEMENTATION

Nursing Actions	Evidence - Based Rationale(s)
Educate family on how to place furnitures in the house	Family learning and particity how to take care of their home is imperative for future safety of the family

EVALUATION

Family member states the important of well placed furniture as evidenced by the furnitures located at the right spot
