35 Abdominal and Genitourinary Trauma 965
36 Multisystem Trauma and Trauma in Special Patient Populations 976

PART 11

Special Patient Populations 988

37 Obstetrics and Care of the Newborn 988
38 Pediatrics 1024
39 Geriatrics 1090
40 Patients with Special Challenges 1117
41 The Combat Veteran 1145

PART 12

EMS Operations 1155

42 Ambulance Operations and Air Medical Response 1155
43 Gaining Access and Patient Extrication 1179
44 Hazardous Materials 1196
45 Multiple-Casualty Incidents and Incident Management 1215
46 EMS Response to Terrorism Involving Weapons of Mass Destruction 1232

Appendix 1 ALS-Assist Skills 1249
Appendix 2 Advanced Airway Management 1256
Appendix 3 Agricultural and Industrial Emergencies 1294
Answer Key 1302
Glossary 1338
Index 1351

EMT Skills xxi
Preface xxiii
What's New in the 10th Edition? xxv
About the Authors xxxi

PART 1
Preparatory/Public Health 1

1 Emergency Medical Care Systems, Research, and Public Health 1

Introduction 2
The Emergency Medical Services System 2
- A Brief History 2
- Technical Assistance Program Assessment Standards 3

The EMT 6
- Roles and Responsibilities 6
- Professional Attributes 9
- State EMS Agency Role 10
- Medical Direction/Medical Oversight 11
- Quality Improvement 11
- Issues in Patient Safety 12

Research and EMS Care 12
Public Health 13

2 Workforce Safety and Wellness of the EMT 17

Introduction 18
Emotional Aspects of Emergency Care 18
- Death and Dying 18
- High-Stress Situations 20
- Stress Reactions 20
- Stress Management 21
- Critical Incident Stress Management 23

Scene Safety 23
- Protecting Yourself from Disease 23
- Infectious Diseases of Concern to the EMT 28
- Protecting Yourself from Accidental and Work-Related Injury 31

Wellness Principles 34
- Physical Well-Being 34
- Mental Well-Being 35

3 Medical, Legal, and Ethical Issues 39

Introduction 40
The Scope of Practice 40
- Legal Duties 40
- Ethical Responsibilities 42

Issues of Patient Consent and Refusal 43
- Types of Consent 43
- Advance Directives 43
- Refusing Treatment 44

Other Legal Aspects of Emergency Care 48
- Negligence 48
- Intentional Tort 48
- Confidentiality 49
- Health Insurance Portability and Accountability Act (HIPAA) 50
- COBRA and EMTALA 50
- Protecting Yourself in Transport and Transfer Situations 50
- Special Situations 51

4 Documentation 56

Introduction 57
Functions of the Prehospital Care Report 57
- Continuity of Medical Care 57
- Administrative Uses 57
- Legal Document 58
- Educational and Research Uses 58
- Evaluation and Continuous Quality Improvement 58

Collection of Data in Prehospital Care Reports 58
- PCR Formats 58
- PCR Data 59

Legal Concerns 66
- Confidentiality 66
- Distribution 66
- Refusal of Treatment 66
- Falsification 67

Special Situations 68
- Transfer-of-Care Report 68
- Multiple-Casualty Incidents 68
- Special Reports 68

Alternative Documentation Methods 68
- Soap 68
- CHART 69

CHEATED 69
Medical Abbreviations 69

5 Communication 72

Introduction 73
EMS Communications System 74
Components of an Emergency Communications System 74
Communicating Within the System 77
Ground Rules for Radio Communication 77
Phone/Cell Phone Communication 78
Communicating with Dispatch 78
Communicating with Health Care Professionals 79
Team Communication and Dynamics 81
Taking Charge 81
Radio Codes 82
Times 82
Radio Terms 82
Therapeutic Communication 82
Principles of Patient Communication 82
The Communication Process 82
Communication Responses 83
Communicating with the Patient 83
Patient Contact 83
The Patient Interview 84
Nonverbal Communication 84
Asking Questions 86
Considerations in Interviewing 86
Special Circumstances 87

6 Lifting and Moving Patients 92

Introduction 93
Body Mechanics for Safe Lifting 93
Four Basic Principles 93
Posture and Fitness 94
Communication and Teamwork 94
General Guidelines for Lifting and Moving 95
The Power Lift 96
The Squat Lift 96
One-Handed Equipment-Carrying Technique 96
Reaching 97
Pushing and Pulling 97
Lifting and Moving Patients 97
Emergency Moves 97
Urgent Moves 99
Nonurgent Moves 100
Packaging for Transportation 101
Equipment 101
Patient Positioning 107
Packaging Patients for Air Transport 108
General Guidelines for Carrying a Patient Using a Backboard, Portable Stretcher, or Flexible Stretcher 108
Two-Person Carry 109
Four-Person Carry 109
Carrying a Supine Patient on Stairs 109
Neonatal Isolette 109

PART 2

Anatomy and Physiology/Medical Terminology 118

7 Anatomy, Physiology, and Medical Terminology 118

Introduction 120
Anatomical Terms 120
Body Systems 122
The Musculoskeletal System 122
The Respiratory System 132
The Circulatory System 138
The Nervous System 144
The Endocrine System 148
The Integumentary System (Skin) 150
The Digestive System 150
The Urinary or Renal System 152
The Reproductive System 152
Medical Terminology 152
Medical Words and Word Parts 156

PART 3

Pathophysiology 164

8 Pathophysiology 164

Introduction 165
Cellular Metabolism 165
Aerobic Metabolism 165
Anaerobic Metabolism 166
Components Necessary for Adequate Perfusion 167
Composition of Ambient Air 168
Patency of the Airway 169
Respiratory Compromise Associated with Mechanics of Ventilation 170
Regulation of Ventilation 174
Ventilation/Perfusion Ratio 176

Transport of Oxygen and Carbon Dioxide by the Blood 178
Blood Volume 180
Pump Function of the Myocardium 181
Systemic Vascular Resistance 183
Microcirculation 185
Blood Pressure 186

PART 4
Life Span Development 190

9 Life Span Development 190

Introduction 191
Life Span Development 191
Neonates and Infants 191
Toddlers and Preschool-Age Children 194
School-Age Children 195
Adolescence 196
Early Adulthood 197
Middle Adulthood 197
Late Adulthood 198

PART 5
Airway Management, Respiration, and Artificial Ventilation 202

10 Airway Management, Artificial Ventilation, and Oxygenation 202

Introduction 204
Respiration 204
Respiratory System Review 204
Anatomy of the Respiratory System 205
Mechanics of Ventilation (Pulmonary Ventilation) Review 207
Respiratory Physiology Review 209
Pathophysiology of Pulmonary Ventilation and External and Internal Respiration 211
Airway Anatomy in Infants and Children 212
Airway Assessment 213
Airway Functions and Considerations 213
Abnormal Upper Airway Sounds 214
Opening the Mouth 215
Opening the Airway 215
Suctioning 218
Airway Adjuncts 220
Assessment of Breathing 223
Relationship of Tidal Volume and Respiratory Rate in Assessment of Breathing 223
Assessing for Adequate Breathing 224
Adequate Breathing 225
Inadequate Breathing 226
Making the Decision to Assist Ventilation or Not 228
Techniques of Artificial Ventilation 229
Differences Between Normal Spontaneous Ventilation and Positive Pressure Ventilation 229
Basic Considerations 230
Mouth-to-Mouth Ventilation 232
Mouth-to-Mask and Bag-Valve Ventilation: General Considerations 232
Mouth-to-Mask Ventilation 234
Bag-Valve-Mask Ventilation 236
Flow-Restricted, Oxygen-Powered Ventilation Device (FROPVD) 239
Automatic Transport Ventilator (ATV) 241
Ventilation of the Patient Who Is Breathing Spontaneously 242
Continuous Positive Airway Pressure (CPAP) 242
Hazards of Overventilation 245
Special Considerations in Airway Management and Ventilation 246
A Patient with a Stoma or Tracheostomy Tube 246
Infants and Children 247
Patients with Facial Injuries 248
Foreign Body Airway Obstruction 248
Dental Appliances 248
Oxygen Therapy 248
Oxygen Cylinders 248
Safety Precautions 249
Pressure Regulators 249
Oxygen Humidifiers 250
Indications for Oxygen Use 250
Hazards of Oxygen Administration 251
Clinical Decision Making Regarding Oxygen Administration 251
When and When Not to Administer Oxygen 252
Oxygen Administration Procedures 252
Terminating Oxygen Therapy 253
Transferring the Oxygen Source: Portable to On-Board 253
Oxygen Delivery Equipment 253

PART 6
Assessment 264

11 Baseline Vital Signs, Monitoring Devices, and History Taking 266

Introduction 267
Gathering Patient Information 267

Baseline Vital Signs 268
Respiration 268
Pulse 270
Skin 272
Pupils 274
Blood Pressure 275
Testing Orthostatic Vital Signs 278
Vital Sign Reassessment 279
Monitoring Equipment 279
Pulse Oximeter: Oxygen Saturation Assessment 279
Noninvasive Blood Pressure Monitor 281
Preparing to Take the History 281
Gain Control of the Scene 281
Achieve a Smooth Transition of Care 282
Reduce the Patient's Anxiety 282
Maintain Control 283
Taking the History 283
Statistical and Demographic Information 284
Current Health Status 284
Techniques for Taking a Patient History 284
Standardized Approach to History Taking 285
Sensitive Topics or Special Challenges 287

12 Scene Size-up 293

Introduction 294
Take the Necessary Standard Precautions and Other Personal Protection Precautions 295
Determine Scene Safety 296
Consider Dispatch Information 296
Consider the Need for Additional or Specialized Resources 296
Consider Scene Characteristics 297
Protect the Patient 302
Protect Bystanders 303
Control the Scene 303
Maintain Situation Awareness 304
Determine the Nature of the Problem 304
Determine the Mechanism of Injury 304
Determine the Nature of the Illness 307
Determine the Number of Patients 307

13 Patient Assessment 311

Introduction 313
Part 1: Scene Size-up 313
Part 2: Primary Assessment 314
Form a General Impression of the Patient 316
Determine If the Patient Is Injured or Ill 317
Obtain the Chief Complaint 318
Identify Immediate Life Threats During the General Impression 318
Establish In-Line Stabilization 319
Position the Patient for Assessment 319
Assess Level of Consciousness (Mental Status) 319
Assess the Level of Responsiveness 320
Assess the Airway 322
Determine Airway Status 322
Open the Airway 323
Assess Breathing 324
Assess Rate and Quality of Breathing 324
Assess Oxygenation 326
Oxygen Therapy in the Patient with Adequate Breathing 326
Assess Circulation 326
Assess the Pulse 327
Identify Major Bleeding 328
Assess Perfusion 328
Establish Patient Priorities 330
Part 3: Secondary Assessment 332
Overview of Secondary Assessment: Anatomical and Body Systems Approaches, Baseline Vital Signs, and History 334
Performing the Secondary Assessment: An Anatomical Approach 334
Performing the Secondary Assessment: A Body Systems Approach 343
Assess Baseline Vital Signs 344
Obtain a History 344
Secondary Assessment: Trauma Patient 334
Reevaluate the Mechanism of Injury 345
Significant Mechanisms of Injury 345
Rapid Secondary Assessment: Trauma Patient with Significant Mechanism of Injury, Altered Mental Status, Multiple Injuries, or Critical Finding (*Unstable*) 347
Continue Spinal Stabilization 347
Consider an Advanced Life Support Request 347
Reconsider the Transport Decision 347
Reassess Mental Status 347
Perform a Rapid Secondary Assessment 349
Assess Baseline Vital Signs 359
Obtain a History 361
Prepare the Patient for Transport 362
Provide Emergency Care 363
Trauma Score 365
Modified Secondary Assessment: Trauma Patient with *NO* Significant Mechanism of Injury, Altered Mental Status, Multiple Injuries, or Critical Finding (*Stable*) 365
Perform a Modified Secondary Assessment 365
Obtain Baseline Vital Signs and History 367
Perform a Rapid Secondary Assessment if Indicated 367
Secondary Assessment: Medical Patient 367

Medical Patient Who Is Not Alert or Is Disoriented, Is Responding Only to Verbal or Painful Stimuli, or Is Unresponsive 369
Perform a Rapid Secondary Assessment for the Medical Patient 369
Assess Baseline Vital Signs 373
Position the Patient 373
Obtain a History 374
Provide Emergency Care 375
Make a Transport Decision 375
Responsive Medical Patient Who Is Alert and Oriented 375
Assess Patient Complaints: OPQRST 375
Complete the History 376
Perform a Modified Secondary Assessment 376
Assess Baseline Vital Signs 376
Provide Emergency Care 376
Make a Transport Decision 376
Part 4: Reassessment 377
Purposes of the Reassessment 377
Detect Any Change in Condition 377
Identify Any Missed Injuries or Conditions 378
Adjust the Emergency Care 378
Repeat the Primary Assessment 379
Reassess Mental Status 379
Reassess the Airway 379
Reassess Breathing 379
Reassess Oxygenation 379
Reassess Circulation 379
Reestablish Patient Priorities 380
Complete the Reassessment 380
Reassess and Record Vital Signs 380
Repeat Components of the Secondary Assessment for Other Complaints 380
Check Interventions 380
Note Trends in Patient Condition 380

PART 7
Pharmacology 396

14 Pharmacology Medication and Administration 396

Introduction 397
Administering Medications 397
Medications Commonly Administered by the EMT 398
Medications Carried on the EMS Unit 398
Medications Prescribed for the Patient 398
Medication Names 400
Routes of Administration 401
Medication Forms 401
Essential Medication Information 403
Indications 403
Contraindications 403
Dose 403
Administration 404
Actions 404
Side Effects 404
Key Steps in Administering Medications 404
Obtain an Order from Medical Direction 404
Select the Proper Medication 404
Verify the Patient's Prescription 405
Check the Expiration Date 405
Check for Discoloration or Impurities 405
Verify the Form, Route, and Dose 405
Medication Administration: The Five "Rights" 405
Documentation 406
Reassessment Following Administration 406
Sources of Medication Information 406

PART 8
Shock and Resuscitation 409

15 Shock and Resuscitation 409

Introduction 410
Shock 410
Etiologies of Shock 411
Categories of Shock 413
Specific Types of Shock 417
The Body's Response to Shock 418
Stages of Shock 419
Shock Assessment 421
Age Considerations in Shock 424
General Goals of Prehospital Management of Shock 424
Resuscitation in Cardiac Arrest 424
Pathophysiology of Cardiac Arrest 425
Terms Related to Resuscitation 425
Withholding a Resuscitation Attempt 426
The Chain of Survival 426
Automated External Defibrillation and Cardiopulmonary Resuscitation 427
Types of Defibrillators 427
Analysis of Cardiac Rhythms 428
When and When Not to Use the AED 430
Recognizing and Treating Cardiac Arrest 431
Assessment-Based Approach: Cardiac Arrest 431
Performing Defibrillation 432
Transporting the Cardiac Arrest Patient 434

Providing for Advanced Cardiac Life Support 434
Summary: Assessment and Care 434
Special Considerations for the AED 435
Safety Considerations 435
AED Maintenance 437
Training and Skills Maintenance 437
Medical Direction and the AED 437
Energy Levels of Defibrillators 437
Cardiac Pacemakers 438
Automatic Implantable Cardioverter Defibrillators 438
Automated Chest Compression Devices 438

PART 9
Medicine 445

16 Respiratory Emergencies 445
Introduction 446
Respiratory Anatomy, Physiology, and Pathophysiology 446
Normal Breathing 447
Abnormal Breathing 447
Respiratory Distress 448
Pathophysiology of Conditions That Cause Respiratory Distress 450
Obstructive Pulmonary Diseases 450
Other Conditions That Cause Respiratory Distress 455
Metered-Dose Inhalers and Small-Volume Nebulizers 464
Using a Metered-Dose Inhaler 464
Using a Small-Volume Nebulizer 464
Advair: Not for Emergency Use 467
Age-Related Variations: Pediatrics and Geriatrics 468
Pediatric Patients 468
Respiratory Distress in the Pediatric Patient: Assessment and Care 468
Geriatric Patients 470
Respiratory Distress in the Geriatric Patient: Assessment and Care 470
Assessment and Care: General Guidelines 471
Assessment-Based Approach: Respiratory Distress 471
Summary: Assessment and Care 479

17 Cardiovascular Emergencies 489
Introduction 490
Review of the Circulatory System Anatomy and Physiology 490
The Circulatory System 490
The Electrocardiogram 497
Blood Pressure 498
Inadequate Circulation 498
Cardiac Compromise and Acute Coronary Syndrome (ACS) 498
Atherosclerosis 498
Acute Coronary Syndrome 499
The Dangers of Administering Too Much Oxygen in Acute Coronary Syndrome 503
Other Causes of Cardiac Compromise 504
Nitroglycerin 508
Age-Related Variations: Pediatrics and Geriatrics 508
Pediatric Considerations 508
Geriatric Considerations 510
Assessment and Care: General Guidelines 510
Assessment-Based Approach: Cardiac Compromise and Acute Coronary Syndrome 510
Summary: Assessment and Care 515

18 Altered Mental Status, Stroke, and Headache 524
Introduction 525
Altered Mental Status 525
Assessment-Based Approach: Altered Mental Status 526
Stroke 528
Neurological Deficit Resulting from Stroke 528
Acute Stroke 528
Pathophysiology of Stroke 529
Types of Stroke 529
Stroke or Transient Ischemic Attack 531
Assessment-Based Approach: Stroke and Transient Ischemic Attack 532
Summary: Assessment and Care 539
Headache 539
Types of Headache 539
Assessment 541
Emergency Medical Care 541

19 Seizures and Syncope 546
Introduction 547
Seizure 547
Pathophysiology of Seizures 548
Types of Seizures 548
Assessment-Based Approach to Seizure Activity 551
Summary: Assessment and Care for Seizures 554
Syncope 556

20 Acute Diabetic Emergencies 561
Introduction 562
Understanding Diabetes Mellitus 562
Glucose (Sugar) 562
Hormones That Control Blood Glucose Levels 563
Normal Metabolism and Glucose Regulation 564

Checking the Blood Glucose Level 566
Diabetes Mellitus (DM) 566
Acute Diabetic Emergencies 568
Hypoglycemia 568
Oral Glucose 570
Hyperglycemia 570
Hyperglycemic Condition: Diabetic Ketoacidosis (DKA) 572
Hyperglycemic Condition: Hyperglycemic Hyperosmolar Nonketotic Syndrome (HHNS) 575
Assessment-Based Approach: Altered Mental Status in a Diabetic Emergency 577
Scene Size-up and Primary Assessment 577
History and Secondary Assessment 578
Emergency Medical Care 578
Reassessment 579
Summary: Assessment and Care 579

21 Anaphylactic Reactions 585

Introduction 586
Anaphylactic Reaction 586
Pathophysiology of Anaphylactic Reaction 586
Assessment-Based Approach to Anaphylactic Reaction 589
Summary: Assessment and Care 594
Epinephrine Auto-Injector 596

22 Toxicologic Emergencies 605

Introduction 606
Poisons and Poisonings 606
Poisons and Routes of Exposure 606
Managing the Poisoning Patient 608
Antidotes 608
Ingested Poisons 608
Assessment-Based Approach: Ingested Poisons 608
Activated Charcoal 611
Inhaled Poisons 613
Assessment-Based Approach: Inhaled Poisons 613
Injected Poisons 615
Assessment-Based Approach: Injected Poisons 615
Absorbed Poisons 616
Assessment-Based Approach: Absorbed Poisons 617
Summary: Assessment and Care 618
Specific Types of Poisoning 621
Food Poisoning 621
Carbon Monoxide Poisoning 621
Cyanide 622
Acids and Alkalis 623
Hydrocarbons 623
Methanol (Wood Alcohol) 624
Isopropanol (Isopropyl Alcohol) 625
Ethylene Glycol 625
Poisonous Plants 626
Suicide Bags 626
Poison Control Centers 626
Drug and Alcohol Emergencies 627
Assessment-Based Approach: Drug and Alcohol Emergencies 627
Summary: Assessment and Care 632
Managing a Violent Drug or Alcohol Abuse Patient 634
Specific Substance Abuse Considerations 636
Drug Withdrawal 637
The Alcoholic Syndrome 637
The Withdrawal Syndrome 638
PCP, Cocaine, Amphetamines, Methamphetamines, and PABS 640
Medication Overdose 641
Huffing 641

23 Abdominal, Hematologic, Gynecologic, Genitourinary, and Renal Emergencies 647

Introduction 648
Acute Abdomen 648
Abdominal Structures and Functions 648
Abdominal Pain 650
Conditions That May Cause Acute Abdominal Pain 652
Assessment-Based Approach: Acute Abdomen 657
Summary: Assessment and Care 660
Hematologic Emergencies 660
The Nature of Hematologic Emergencies 660
Gynecologic Emergencies 663
Female Reproductive Structures and Functions 663
Gynecologic Conditions 663
Assessment-Based Approach: Gynecologic Emergencies 667
Genitourinary/Renal Emergencies 668
Genitourinary/Renal Structures and Functions 668
Genitourinary/Renal Conditions 669
Assessment-Based Approach: Genitourinary/Renal Emergencies 672

24 Environmental Emergencies 676

Introduction 677
Heat and Cold Emergencies 677
Regulation of Temperature 677
Exposure to Cold 680
Generalized Hypothermia 680
Pathophysiology of Generalized Hypothermia 681

Local Cold Injury 684
Pathophysiology of Local Cold Injury 684
Assessment-Based Approach: Cold-Related Emergency 684
Summary: Assessment and Care—Cold Emergency 691
Exposure to Heat 693
Hyperthermia 693
Pathophysiology of Heat-Related Emergencies 693
Assessment-Based Approach: Heat-Related Emergency 696
Summary: Assessment and Care—Heat Emergency 700
Bites and Stings 700
Snakebite 701
Insect Bites and Stings 703
Assessment-Based Approach: Bites and Stings 704
Marine Life Bites and Stings 706
Lightning Strike Injuries 706
Pathophysiology of a Lightning Strike Injury 706
Assessment of the Lightning Strike Patient 707
Emergency Care for the Lightning Strike Patient 708
High-Altitude Sickness 708
Acute Mountain Sickness 709
High-Altitude Pulmonary Edema 709
High-Altitude Cerebral Edema 709

25 Submersion Incidents: Drowning and Diving Emergencies 713

Introduction 714
Water-Related Emergencies 714
Definitions 714
Incidence of Drowning 715
Prognostic Predictors 716
Pathophysiology of Drowning 716
Diving Emergencies 717
Safety Measures in Water-Related Emergencies 717
Possible Spine Injury 718
Resuscitation 718
Assessment-Based Approach: Drowning and Water-Related Emergencies 719
Summary: Assessment and Care 722
Scuba or Deepwater Diving Emergencies 723
Basic Laws of Physics Related to Scuba or Deepwater Diving Emergencies 725
Decompression Sickness 725

26 Behavioral Emergencies 730

Introduction 731
Behavioral Problems 731
Behavioral Change 731
Psychiatric Problems 733
Violence 735
Dealing with Behavioral Emergencies 736
Basic Principles 736
Techniques for Treating Behavioral Emergency Patients 737
Assessment-Based Approach: Behavioral Emergencies 738
Summary: Assessment and Care 741
Restraining a Patient 741
Legal Considerations 745
Consent 745
Refusal of Care 745
Using Reasonable Force 745
Police and Medical Direction 746
False Accusations 746

PART 10
Trauma 750

27 Trauma Overview: The Trauma Patient and the Trauma System 750

Introduction 751
The Kinetics of Trauma 751
Mass and Velocity 751
Acceleration and Deceleration 752
Energy Changes Form and Direction 752
Impacts 752
Mechanisms of Injury 753
Vehicle Collisions 753
Falls 762
Penetrating Injuries 762
Blast Injuries 764
The Multisystem Trauma Patient 764
The Golden Period and Platinum Ten Minutes 765
The Trauma System 766
Golden Principles of Prehospital Trauma Care 767
Special Considerations in Trauma Care 769

28 Bleeding and Soft Tissue Trauma 772

Introduction 773
External Bleeding 773
Severity 773
Types of Bleeding 774
Methods of Controlling External Bleeding 775
Assessment-Based Approach: External Bleeding 777
Bleeding from the Nose, Ears, or Mouth 778
Internal Bleeding 779
Severity 779
Assessment-Based Approach: Internal Bleeding 779
