anxiety

1. What is my research question?

- Does anxiety affects students academic performance?
- Does students who experience high level of anxiety lack academic performance?

2. What is the main independent variable? How will I operationally define it?

- What causes anxiety?
- Factors of anxiety?

3. What is the main dependent variable?

- The students academic performance

4. Hypothesis? Prediction?

Hypothesis: Students who experience having anxiety will lack academic performance

Prediction: as oppose to students who suffer a high-level of anxiety to students who classify as having no anxiety, will lack academic performance

5. Research method: observational study
