

The figure below shows a graph as it was generated by Excel. How should this graph be changed or improved before it is submitted in a lab report. *Select all correct answers.*

- The x and y axes require labels.
- There should be a line on the graph for the treatment of Time.
- It should be changed to a bar graph.
- The treatments (heart rate, blood pressures) require the units of measurement.
- A descriptive title must be added.
