

1. Read for understanding the assigned research article related to range of motion (ROM). Hint: You may need to read more than once.
2. Summarize and analyze the article (i.e. what it is about? to whom might be important? What is the significance of the topic in relation to physical therapy? What are the possible implications for the clinic and/or future research?)
 - ❖ Avoid plagiarism (this will be limited to a 25% similarity index)
 - ❖ Use the Rubric Sheet provided; it helps you stay on track.
3. Cover page (including the Course name & number, Title of the Article, and your name and date of submission) is required.
4. Format: Double-spaced; Times New Roman 12-pt font; 1-inch margins; Numbered paged; Written in 3-4 pages (not including the cover page)
5. Pay attention to spelling accuracy and sentence construction.
 - ❖ Download Grammarly to your computer, laptop, or device (stop by library for information).
 - ❖ Deductions will be applied based on frequency of errors.

Performance Element	Distinguished 100% Points
