Abstract	10
Introduction & Definition of paradoxical thinking.	20
Define "cause and effect" thinking, explain, and compare both terms (compare "cause and effect" thinking to paradoxical thinking). Explain why cause and effect thinking hinders achieving mastery.	20
Provide an example of a company that demonstrates paradoxical thinking	20
Discuss whether or not one can learn paradoxical thinking and discuss the reasons for your answer (Your discussion should be a very powerful piece that seeks to convince your reader with all the reasons both professionally and personally why she/he should learn paradoxical thinking.)	30
Paradoxical thinking is one of eight skills related to intelligence. Correctly discuss these skills and why paradoxical thinking is probably the least used [<i>memory, logic, judgment, perception, intuition, reason, imagination, and paradoxical thinking</i>]	20
Summarize your understanding of how management and leadership can utilize paradoxical thinking to improve the organization.	40
Use of illustrations, charts, and/or graphics	10
Conclusion section	10
Correct spelling, grammar, sentence structure, written in the THIRD person perspective, and has correct APA citations and formatting, and References page (minimum five sources - at least four are peer reviewed)	10
Total	200
