

Criteria	Ratings				Pts
<p>Select one of the possible topics provided and complete the MindMap.</p> <p>Describe the Pathophysiology and Etiology of the primary diagnosis. List risk factors related to the primary diagnosis.</p>	<p>30 to >27.0 pts Excellent</p> <p>A thoroughly completed MindMap with a selected topic was submitted. The response accurately and thoroughly describes in detail the pathophysiology at the cellular level and shows understanding of the primary diagnosis. The response accurately and thoroughly identifies etiology for the diagnosis and lists appropriate risk factors.</p>	<p>27 to >23.0 pts Good</p> <p>A completed MindMap with a selected topic was submitted. The response describes the pathophysiology at the organ level of the primary diagnosis. The response does not identify specific etiology for the diagnosis and some risk factors are not linked to diagnosis.</p>	<p>23 to >19.0 pts Fair</p> <p>An inaccurately complete or vague MindMap with a selected topic was submitted. The response inaccurately or vaguely describes the pathophysiology of the primary diagnosis. The response inaccurately or vaguely identifies etiology for the diagnosis and all risk factors are not linked to diagnosis.</p>	<p>19 to >0 pts Poor</p> <p>An incomplete MindMap with a selected topic was submitted, or is missing. The response does not describe the pathophysiology of the primary diagnosis. The response does not identify etiology for this diagnosis and risk factors are missing.</p>	30 pts
<p>What are the patient's signs and symptoms for this diagnosis? How does the diagnosis impact other body systems and what are the possible complications?</p>	<p>20 to >17.0 pts Excellent</p> <p>The response accurately and thoroughly describes in detail the patient's signs and symptoms for this diagnosis. The response accurately and thoroughly describes in detail how this diagnosis might impact other body systems and their possible complications.</p>	<p>17 to >14.0 pts Good</p> <p>The response accurately describes the patient's signs and symptoms for this diagnosis. The response accurately describes how this diagnosis might impact other body systems and their possible complications.</p>	<p>14 to >12.0 pts Fair</p> <p>The response inaccurately or vaguely describes the patient's signs and symptoms for this diagnosis. The response inaccurately or vaguely describes how this diagnosis might impact other body systems and their possible complications.</p>	<p>12 to >0 pts Poor</p> <p>The response inaccurately and vaguely describes the patient's signs and symptoms for this diagnosis, or is missing. The response inaccurately and vaguely describes how the diagnosis might impact other body systems and their possible complications, or is missing.</p>	20 pts
<p>What diagnostic tests or labs would you order to confirm the primary diagnosis?</p>	<p>20 to >17.0 pts Excellent</p> <p>The response accurately and thoroughly describes in detail the diagnostic tests and labs to order for</p>	<p>17 to >14.0 pts Good</p> <p>The response accurately and thoroughly describes in detail the diagnostic tests and labs to order for</p>	<p>14 to >12.0 pts Fair</p> <p>The response inaccurately or vaguely describes the diagnostic tests and labs to order for primary diagnosis</p>	<p>12 to >0 pts Poor</p> <p>The response inaccurately and vaguely describes the diagnostic tests</p>	20 pts
