Feedback to Learner

Hi ELIZABETH - You earned a grade of C on this Power Point (72%). This paper has a good foundation, but there are several areas needing more detail and explanation. Please read my comments and get back to me if you have any questions. Now, let's take a look at your work.

As I read your introduction, ELIZABETH, it struck me that you have the right start for the Power Point assignment. I thought you organized your thoughts in a somewhat clear and rational fashion, but more explanation of the company's Supplier Responsibility Code of Conduct information and the company's commitment to ethical business practices and social responsibility would have helped.

Please make sure to follow the directions posted in the Power Point assignment requirements on Blackboard. You could have demonstrated in more depth how your company's supplier code of conduct is committed to ethical business practices and social responsibility. A detailed summary in these areas would have added depth to your presentation. I would like to have seen an in-depth analysis of these important areas.

In this section you discussed your company's stance on specific social and responsibility issues. This is an excellent discussion and shows depth of thought on your part. However, more detail in this area would have added depth to your presentation. In that respect, I refer you to Ebscohost which can be found on iCampus. When you engage in this kind of research, then you have the foundation to provide solid support for your response.

You have thoroughly identified key ways in which your company's Code of Conduct has changed. BTW, here is a website that lists the 18 best codes of conduct for major companies (please check it out: <https://insight.com/resources/18-of-the-best-code-of-conduct-examples/>)

At this point, I'm not sure that you have good grasp of the assignment. It is essential that you thoroughly examine how your company's Supplier Code of Conduct helps the organization operate as a socially responsible organization. I encourage you to devote more time to research.

Needs improvement in this area.

Excellent use of SWS in your references!

Kudos! I liked the way you presented the assignment and applaud your conscientiousness in completing this good work. I commend you on your excellent command of the English language.

Thanks for reviewing my feedback ELIZABETH. I hope it was helpful. If you have any questions or concerns,

[Redacted Signature]
