

"THEY SAY"

ONE

"THEY SAY"

*Starting with What Others Are Saying*

NOT LONG AGO we attended a talk at an academic conference where the speaker's central claim seemed to be that a certain sociologist—call him Dr. X—had done very good work in a number of areas of the discipline. The speaker proceeded to illustrate his thesis by referring extensively and in great detail to various books and articles by Dr. X and by quoting long passages from them. The speaker was obviously both learned and impassioned, but as we listened to his talk we found ourselves somewhat puzzled: the argument—that Dr. X's work was very important—was clear enough, but why did the speaker need to make it in the first place? Did anyone dispute it? Were there commentators in the field who had argued against X's work or challenged its value? Was the speaker's interpretation of what X had done somehow novel or revolutionary? Since the speaker gave no hint of an answer to any of these questions, we could only wonder why he was going on and on about X. It was only after the speaker finished and took questions from the audience that we got a clue: in response to one questioner, he referred to several critics who had

The hypothetical audience in the figure on p. 4 reacts similarly.

vigorously questioned Dr. X's ideas and convinced many sociologists that Dr. X's work was unsound.

This story illustrates an important lesson: that to give writing the most important thing of all—namely, a point—a writer needs to indicate clearly not only what his or her thesis is, but also what larger conversation that thesis is responding to. Because our speaker failed to mention what others had said about Dr. X's work, he left his audience unsure about why he felt the need to say what he was saying. Perhaps the point was clear to other sociologists in the audience who were more familiar with the debates over Dr. X's work than we were. But even they, we bet, would have understood the speaker's point better if he'd sketched in some of the larger conversation his own claims were a part of and reminded the audience about what "they say."

This story also illustrates an important lesson about the *order* in which things are said: to keep an audience engaged, a writer needs to explain what he or she is responding to—either before offering that response or, at least, very early in the discussion. Delaying this explanation for more than one or two paragraphs in a very short essay or blog entry, three or four pages in a longer work, or more than ten or so pages in a book reverses the natural order in which readers process material—and in which writers think and develop ideas. After all, it seems very unlikely that our conference speaker first developed his defense of Dr. X and only later came across Dr. X's critics. As someone knowledgeable in his field, the speaker surely encountered the criticisms first and only then was compelled to respond and, as he saw it, set the record straight.

Therefore, when it comes to constructing an argument (whether orally or in writing), we offer you the following advice: remember that you are entering a conversation and therefore need to start with "what others are saying," as the

See how an essay about community college opens by quoting its critics, p. 255.

title of this chapter recommends, and then introduce your own ideas as a response. Specifically, we suggest that you summarize what "they say" as soon as you can in your text, and remind readers of it at strategic points as your text unfolds. Though it's true that not all texts follow this practice, we think it's important for all writers to master it before they depart from it.

This is not to say that you must start with a detailed list of everyone who has written on your subject before you offer your own ideas. Had our conference speaker gone to the opposite extreme and spent most of his talk summarizing Dr. X's critics with no hint of what he himself had to say, the audience probably would have had the same frustrated "why-is-he-going-on-like-this?" reaction. What we suggest, then, is that as soon as possible you state your own position and the one it's responding to *together*, and that you think of the two as a unit. It is generally best to summarize the ideas you're responding to briefly, at the start of your text, and to delay detailed elaboration until later. The point is to give your readers a quick preview of what is motivating your argument, not to drown them in details right away.

Starting with a summary of others' views may seem to contradict the common advice that writers should lead with their own thesis or claim. Although we agree that you shouldn't keep readers in suspense too long about your central argument, we also believe that you need to present that argument as part of some larger conversation, indicating something about the arguments of others that you are supporting, opposing, amending, complicating, or qualifying. One added benefit of summarizing others' views as soon as you can: you let those others do some of the work of framing and clarifying the issue you're writing about.

Consider, for example, how George Orwell starts his famous essay "Politics and the English Language" with what others are saying.

Most people who bother with the matter at all would admit that the English language is in a bad way, but it is generally assumed that we cannot by conscious action do anything about it. Our civilization is decadent and our language—so the argument runs—must inevitably share in the general collapse. . . .

[But] the process is reversible. Modern English . . . is full of bad habits . . . which can be avoided if one is willing to take the necessary trouble.

GEORGE ORWELL, "Politics and the English Language"

Orwell is basically saying, "Most people assume that we cannot do anything about the bad state of the English language. But I say we can."

Of course, there are many other powerful ways to begin. Instead of opening with someone else's views, you could start with an illustrative quotation, a revealing fact or statistic, or—as we do in this chapter—a relevant anecdote. If you choose one of these formats, however, be sure that it in some way illustrates the view you're addressing or leads you to that view directly, with a minimum of steps.

In opening this chapter, for example, we devote the first paragraph to an anecdote about the conference speaker and then move quickly at the start of the second paragraph to the misconception about writing exemplified by the speaker. In the following opening, from an opinion piece in the *New York Times Book Review*, Christina Nehring also moves quickly from an anecdote illustrating something she dislikes to her own claim—that book lovers think too highly of themselves.

"I'm a reader!" announced the yellow button. "How about you?" I looked at its bearer, a strapping young guy stalking my town's Festival of Books. "I'll bet you're a reader," he volunteered, as though we were

two geniuses well met. "No," I replied. "Absolutely not," I wanted to yell, and fling my Barnes & Noble bag at his feet. Instead, I mumbled something apologetic and melted into the crowd.

There's a new piety in the air: the self congratulation of book lovers.

CHRISTINA NEHRING, "Books Make You a Boring Person"

Nehring's anecdote is really a kind of "they say": book lovers keep telling themselves how great they are.

### TEMPLATES FOR INTRODUCING WHAT "THEY SAY"

There are lots of conventional ways to introduce what others are saying. Here are some standard templates that we would have recommended to our conference speaker.

- ▶ A number of sociologists have recently suggested that X's work has several fundamental problems.
- ▶ It has become common today to dismiss \_\_\_\_\_.
- ▶ In their recent work, Y and Z have offered harsh critiques of \_\_\_\_\_ for \_\_\_\_\_.

### TEMPLATES FOR INTRODUCING "STANDARD VIEWS"

The following templates can help you make what we call the "standard view" move, in which you introduce a view that has become so widely accepted that by now it is essentially the conventional way of thinking about a topic.

- ▶ Americans have always believed that individual effort can triumph over circumstances.
- ▶ Conventional wisdom has it that \_\_\_\_\_.
- ▶ Common sense seems to dictate that \_\_\_\_\_.
- ▶ The standard way of thinking about topic X has it that \_\_\_\_\_.
- ▶ It is often said that \_\_\_\_\_.
- ▶ My whole life I have heard it said that \_\_\_\_\_.
- ▶ You would think that \_\_\_\_\_.
- ▶ Many people assume that \_\_\_\_\_.

These templates are popular because they provide a quick and efficient way to perform one of the most common moves that writers make: challenging widely accepted beliefs, placing them on the examining table, and analyzing their strengths and weaknesses.

#### TEMPLATES FOR MAKING WHAT "THEY SAY" SOMETHING YOU SAY

Another way to introduce the views you're responding to is to present them as your own. That is, the "they say" that you respond to need not be a view held by others; it can be one that you yourself once held or one that you are ambivalent about.

- ▶ I've always believed that museums are boring.
- ▶ When I was a child, I used to think that \_\_\_\_\_.

- ▶ Although I should know better by now, I cannot help thinking that \_\_\_\_\_.
- ▶ At the same time that I believe \_\_\_\_\_, I also believe \_\_\_\_\_.

#### TEMPLATES FOR INTRODUCING SOMETHING IMPLIED OR ASSUMED

Another sophisticated move a writer can make is to summarize a point that is not directly stated in what "they say" but is implied or assumed.

- ▶ Although none of them have ever said so directly, my teachers have often given me the impression that education will open doors.
- ▶ One implication of X's treatment of \_\_\_\_\_ is that \_\_\_\_\_.
- ▶ Although X does not say so directly, she apparently assumes that \_\_\_\_\_.
- ▶ While they rarely admit as much, \_\_\_\_\_ often take for granted that \_\_\_\_\_.

These are templates that can help you think analytically—to look beyond what others say explicitly and to consider their unstated assumptions, as well as the implications of their views.

#### TEMPLATES FOR INTRODUCING AN ONGOING DEBATE

Sometimes you'll want to open by summarizing a debate that presents two or more views. This kind of opening

demonstrates your awareness that there are conflicting ways to look at your subject, the clear mark of someone who knows the subject and therefore is likely to be a reliable, trustworthy guide. Furthermore, opening with a summary of a debate can help you explore the issue you are writing about before declaring your own view. In this way, you can use the writing process itself to help you discover where you stand instead of having to commit to a position before you are ready to do so.

Here is a basic template for opening with a debate.

- In discussions of X, one controversial issue has been \_\_\_\_\_. On the one hand, \_\_\_\_\_ argues \_\_\_\_\_. On the other hand, \_\_\_\_\_ contends \_\_\_\_\_. Others even maintain \_\_\_\_\_. My own view is \_\_\_\_\_.

The cognitive scientist Mark Aronoff uses this kind of template in an essay on the workings of the human brain.

Theories of how the mind/brain works have been dominated for centuries by two opposing views. One, rationalism, sees the human mind as coming into this world more or less fully formed—preprogrammed, in modern terms. The other, empiricism, sees the mind of the newborn as largely unstructured, a blank slate.

MARK ARONOFF, "Washington Sleeped Here"

Another way to open with a debate involves starting with a proposition many people agree with in order to highlight the point(s) on which they ultimately disagree.

- When it comes to the topic of \_\_\_\_\_, most of us will readily agree that \_\_\_\_\_. Where this agreement usually ends,

however, is on the question of \_\_\_\_\_. Whereas some are convinced that \_\_\_\_\_, others maintain that \_\_\_\_\_.

The political writer Thomas Frank uses a variation on this move.

That we are a nation divided is an almost universal lament of this bitter election year. However, the exact property that divides us—elemental though it is said to be—remains a matter of some controversy.

THOMAS FRANK, "American Psyche"

#### KEEP WHAT "THEY SAY" IN VIEW

We can't urge you too strongly to keep in mind what "they say" as you move through the rest of your text. After summarizing the ideas you are responding to at the outset, it's very important to continue to keep those ideas in view. Readers won't be able to follow your unfolding response, much less any complications you may offer, unless you keep reminding them what claims you are responding to.

In other words, even when presenting your own claims, you should keep returning to the motivating "they say." The longer and more complicated your text, the greater the chance that readers will forget what ideas originally motivated it—no matter how clearly you lay them out at the beginning. At strategic moments throughout your text, we recommend that you include what we call "return sentences." Here is an example.

- In conclusion, then, as I suggested earlier, defenders of \_\_\_\_\_ can't have it both ways. Their assertion that \_\_\_\_\_ is contradicted by their claim that \_\_\_\_\_.

We ourselves use such return sentences at every opportunity in this book to remind you of the view of writing that our book questions—that good writing means making true or smart or logical statements about a given subject with little or no reference to what others say about it.

By reminding readers of the ideas you're responding to, return sentences ensure that your text maintains a sense of mission and urgency from start to finish. In short, they help ensure that your argument is a genuine response to others' views rather than just a set of observations about a given subject. The difference is huge. To be responsive to others and the conversation you're entering, you need to start with what others are saying and continue keeping it in the reader's view.

#### Exercises

1. The following is a list of arguments that lack a "they say"—any sense of who needs to hear these claims, who might think otherwise. Like the speaker in the cartoon on page 4 who declares that *The Sopranos* presents complex characters, these one-sided arguments fail to explain what view they are responding to—what view, in effect, they are trying to correct, add to, qualify, complicate, and so forth. Your job in this exercise is to provide each argument with such a counterview. Feel free to use any of the templates in this chapter that you find helpful.

- a. Our experiments suggest that there are dangerous levels of chemical X in the Ohio groundwater.
  - b. Material forces drive history.
  - c. Proponents of Freudian psychology question standard notions of "rationality."
  - d. Male students often dominate class discussions.
  - e. The film is about the problems of romantic relationships.
  - f. I'm afraid that templates like the ones in this book will stifle my creativity.
2. Below is a template that we derived from the opening of David Zinczenko's "Don't Blame the Eater" (p. 462). Use the template to structure a passage on a topic of your own choosing. Your first step here should be to find an idea that you support that others not only disagree with but actually find laughable (or, as Zinczenko puts it, worthy of a Jay Leno monologue). You might write about one of the topics listed in the previous exercise (the environment, gender relations, the meaning of a book or movie) or any other topic that interests you.

If ever there was an idea custom-made for a Jay Leno monologue, this was it: \_\_\_\_\_. Isn't that like \_\_\_\_\_? Whatever happened to \_\_\_\_\_?

I happen to sympathize with \_\_\_\_\_, though, perhaps because \_\_\_\_\_.

TWO

“HER POINT IS”

The Art of Summarizing

IF IT IS TRUE, as we claim in this book, that to argue persuasively you need to be in dialogue with others, then summarizing others' arguments is central to your arsenal of basic moves. Because writers who make strong claims need to map their claims relative to those of other people, it is important to know how to summarize effectively what those other people say. (We're using the word “summarizing” here to refer to any information from others that you present in your own words, including that which you paraphrase.)

Many writers shy away from summarizing—perhaps because they don't want to take the trouble to go back to the text in question and wrestle with what it says, or because they fear that devoting too much time to other people's ideas will take away from their own. When assigned to write a response to an article, such writers might offer their own views on the article's *topic* while hardly mentioning what the article itself argues or says. At the opposite extreme are those who do nothing *but* summarize. Lacking confidence, perhaps, in their own ideas, these writers so overload their texts with summaries of others' ideas that their own voice gets lost. And since these summaries are not animated

by the writers' own interests, they often read like mere lists of things that X thinks or Y says—with no clear focus.

As a general rule, a good summary requires balancing what the original author is saying with the writer's own focus. Generally speaking, a summary must at once be true to what the original author says while also emphasizing those aspects of what the author says that interest you, the writer. Striking this delicate balance can be tricky, since it means facing two ways at once: both outward (toward the author being summarized) and inward (toward yourself). Ultimately, it means being respectful of others but simultaneously structuring how you summarize them in light of your own text's central argument.

See how Nicholas Carr summarizes the mission of Google on p. 323, 124.

ON THE ONE HAND,  
PUT YOURSELF IN THEIR SHOES

To write a really good summary, you must be able to suspend your own beliefs for a time and put yourself in the shoes of someone else. This means playing what the writing theorist Peter Elbow calls the “believing game,” in which you try to inhabit the worldview of those whose conversation you are joining—and whom you are perhaps even disagreeing with—and try to see their argument from their perspective. This ability to temporarily suspend one's own convictions is a hallmark of good actors, who must convincingly “become” characters whom in real life they may detest. As a writer, when you play the believing game well, readers should not be able to tell whether you agree or disagree with the ideas you are summarizing.

If, as a writer, you cannot or will not suspend your own beliefs in this way, you are likely to produce summaries that are

so obviously biased that they undermine your credibility with readers. Consider the following summary.

David Zinczenko's article, "Don't Blame the Eater," is nothing more than an angry rant in which he accuses the fast-food companies of an evil conspiracy to make people fat. I disagree because these companies have to make money. . . .

If you review what Zinczenko actually says (pp. 462–64), you should immediately see that this summary amounts to an unfair distortion. While Zinczenko does argue that the practices of the fast-food industry have the effect of making people fat, his tone is never "angry," and he never goes so far as to suggest that the fast-food industry conspires to make people fat with deliberately evil intent.

Another tell-tale sign of this writer's failure to give Zinczenko a fair hearing is the hasty way he abandons the summary after only one sentence and rushes on to his own response. So eager is this writer to disagree that he not only caricatures what Zinczenko says but also gives the article a hasty, superficial reading. Granted, there are many writing situations in which, because of matters of proportion, a one- or two-sentence summary is precisely what you want. Indeed, as writing professor Karen Lunsford (whose own research focuses on argument theory) points out, it is standard in the natural and social sciences to summarize the work of others quickly, in one pithy sentence or phrase, as in the following example.

Several studies (Crackle, 2012; Pop, 2007; Snap, 2006) suggest that these policies are harmless; moreover, other studies (Dick, 2011; Harry, 2007; Tom, 2005) argue that they even have benefits.

But if your assignment is to respond in writing to a single author like Zinczenko, you will need to tell your readers enough about his or her argument so they can assess its merits on their own, independent of you.

When a writer fails to provide enough summary or to engage in a rigorous or serious enough summary, he or she often falls prey to what we call "the closest cliché syndrome," in which what gets summarized is not the view the author in question has actually expressed but a familiar cliché that the writer *mistakes* for the author's view (sometimes because the writer believes it and mistakenly assumes the author must too). So, for example, Martin Luther King Jr.'s passionate defense of civil disobedience in "Letter from Birmingham Jail" might be summarized not as the defense of political protest that it actually is but as a plea for everyone to "just get along." Similarly, Zinczenko's critique of the fast-food industry might be summarized as a call for overweight people to take responsibility for their weight.

Whenever you enter into a conversation with others in your writing, then, it is extremely important that you go back to what those others have said, that you study it very closely, and that you not confuse it with something you already believe. A writer who fails to do this ends up essentially conversing with imaginary others who are really only the products of his or her own biases and preconceptions.

#### ON THE OTHER HAND, KNOW WHERE YOU ARE GOING

Even as writing an effective summary requires you to temporarily adopt the worldview of another, it does not mean ignoring

your own view altogether. Paradoxically, at the same time that summarizing another text requires you to represent fairly what it says, it also requires that your own response exert a quiet influence. A good summary, in other words, has a focus or spin that allows the summary to fit with your own agenda while still being true to the text you are summarizing.

Thus if you are writing in response to the essay by Zinczenko, you should be able to see that an essay on the fast-food industry in general will call for a very different summary than will an essay on parenting, corporate regulation, or warning labels. If you want your essay to encompass all three topics, you'll need to subordinate these three issues to one of Zinczenko's general claims and then make sure this general claim directly sets up your own argument.

For example, suppose you want to argue that it is parents, not fast-food companies, who are to blame for children's obesity. To set up this argument, you will probably want to compose a summary that highlights what Zinczenko says about the fast-food industry *and* parents. Consider this sample.

In his article "Don't Blame the Eater," David Zinczenko blames the fast-food industry for fueling today's so-called obesity epidemic, not only by failing to provide adequate warning labels on its high-calorie foods but also by filling the nutritional void in children's lives left by their overtaxed working parents. With many parents working long hours and unable to supervise what their children eat, Zinczenko claims, children today are easily victimized by the low-cost, calorie-laden foods that the fast-food chains are all too eager to supply. When he was a young boy, for instance, and his single mother was away at work, he ate at Taco Bell, McDonald's, and other chains on a regular basis, and ended up overweight. Zinczenko's hope is that with the new spate of lawsuits against

the food industry, other children with working parents will have healthier choices available to them, and that they will not, like him, become obese.

In my view, however, it is the parents, and not the food chains, who are responsible for their children's obesity. While it is true that many of today's parents work long hours, there are still several things that parents can do to guarantee that their children eat healthy foods. . . .

The summary in the first paragraph succeeds because it points in two directions at once—both toward Zinczenko's own text *and* toward the second paragraph, where the writer begins to establish her own argument. The opening sentence gives a sense of Zinczenko's general argument (that the fast-food chains are to blame for obesity), including his two main supporting claims (about warning labels and parents), but it ends with an emphasis on the writer's main concern: parental responsibility. In this way, the summary does justice to Zinczenko's arguments while also setting up the ensuing critique.

This advice—to summarize authors in light of your own arguments—may seem painfully obvious. But writers often summarize a given author on one issue even though their text actually focuses on another. To avoid this problem, you need to make sure that your "they say" and "I say" are well matched. In fact, aligning what they say with what you say is a good thing to work on when revising what you've written.

Often writers who summarize without regard to their own interests fall prey to what might be called "list summaries," summaries that simply inventory the original author's various points but fail to focus those points around any larger overall claim. If you've ever heard a talk in which the points were connected only by words like "and then," "also," and "in addition,"

### THE EFFECT OF A TYPICAL LIST SUMMARY

you know how such lists can put listeners to sleep—as shown in the figure above. A typical list-summary sounds like this.

The author says many different things about his subject. *First* he says. . . . *Then* he makes the point that. . . . *In addition* he says. . . . *And then* he writes. . . . *Also* he shows that. . . . *And then* he says. . . .

It may be boring list summaries like this that give summaries in general a bad name and even prompt some instructors to discourage their students from summarizing at all.

In conclusion, writing a good summary means not just representing an author's view accurately, but doing so in a way that fits your own composition's larger agenda. On the one hand, it means playing Peter Elbow's believing game and doing justice to the source; if the summary ignores or misrepresents the

source, its bias and unfairness will show. On the other hand, even as it does justice to the source, a summary has to have a slant or spin that prepares the way for your own claims. Once a summary enters your text, you should think of it as joint property—reflecting both the source you are summarizing and your own views.

### SUMMARIZING SATIRICALLY

Thus far in this chapter we have argued that, as a general rule, good summaries require a balance between what someone else has said and your own interests as a writer. Now, however, we want to address one exception to this rule: the satiric summary, in which a writer deliberately gives his or her own spin to someone else's argument in order to reveal a glaring shortcoming in it. Despite our previous comments that well-crafted summaries generally strike a balance between heeding what someone else has said and your own independent interests, the satiric mode can at times be a very effective form of critique because it lets the summarized argument condemn itself without overt editorializing by you, the writer. If you've ever watched *The Daily Show*, you'll recall that it often merely summarizes silly things political leaders have said or done, letting their words or actions undermine themselves.

Consider another example. In September 2001, then-President George W. Bush in a speech to Congress urged the nation's "continued participation and confidence in the American economy" as a means of recovering from the terrorist attacks of 9/11. The journalist Allan Sloan criticized this proposal simply by summarizing it, observing that the president

had equated "patriotism with shopping. Maxing out your credit cards at the mall wasn't self indulgence, it was a way to get back at Osama bin Laden." Sloan's summary leaves no doubt where he stands—he considers Bush's proposal ridiculous, or at least too simple.

### USE SIGNAL VERBS THAT FIT THE ACTION

In introducing summaries, try to avoid bland formulas like "she says," or "they believe." Though language like this is sometimes serviceable enough, it often fails to reflect accurately what's been said. In some cases, "he says" may even drain the passion out of the ideas you're summarizing.

We suspect that the habit of ignoring the action in what we summarize stems from the mistaken belief we mentioned earlier that writing is about playing it safe and not making waves, a matter of piling up truths and bits of knowledge rather than a dynamic process of doing things to and with other people. People who wouldn't hesitate to say "X totally misrepresented," "attacked," or "loved" something when chatting with friends will in their writing often opt for far tamer and even less accurate phrases like "X said."

But the authors you summarize at the college level seldom simply "say" or "discuss" things; they "urge," "emphasize," and "complain about" them. David Zinczenko, for example, doesn't just *say* that fast-food companies contribute to obesity; he *complains* or *protests* that they do; he *challenges*, *chastises*, and *indicts* those companies. The Declaration of Independence doesn't just *talk about* the treatment of the colonies by the British; it *protests against* it. To do justice to the authors you cite,

we recommend that when summarizing—or when introducing a quotation—you use vivid and precise signal verbs as often as possible. Though "he says" or "she believes" will sometimes be the most appropriate language for the occasion, your text will often be more accurate and lively if you tailor your verbs to suit the precise actions you're describing.

### TEMPLATES FOR INTRODUCING SUMMARIES AND QUOTATIONS

- ▶ She advocates a radical revision of the juvenile justice system.
- ▶ They celebrate the fact that \_\_\_\_\_.
- ▶ \_\_\_\_\_, he admits.

| exhort    | warn      |

## Exercises

1. To get a feel for Peter Elbow's "believing game," write a summary of some belief that you strongly disagree with. Then write a summary of the position that you actually hold on this topic. Give both summaries to a classmate or two, and see if they can tell which position you endorse. If you've succeeded, they won't be able to tell.

2. Write two different summaries of David Zinczenko's "Don't Blame the Eater" (pp. 462-64). Write the first one for an essay arguing that, contrary to what Zinczenko claims, there are inexpensive and convenient alternatives to fast-food restaurants. Write the second for an essay that questions whether being overweight is a genuine medical problem rather than a problem of cultural stereotypes. Compare your two summaries: though they are about the same article, they should look very different.
