

The Perspective of Ethology on Animal Behavior & Learning

Video Link: <https://www.youtube.com/watch?v=6hREwakXmAo&t=236s>

This video presents an overview of animal behavior from the perspective of Ethology. It presents a continuum that includes different kinds of animal behavior, ranging from innate behaviors (little or no learning) to learned behaviors. The eight different kinds of behavior and learning described in this video are identified below.
