 This assignment will be submitted to Turnitin™.

Instructions

Assignment 3

Based on the readings for this week, consider what the supply chain or acquisition process might look like in the future. For this paper, you will need to find at least one related article from the library that relates to supply or acquisition in the past or future in order to reflect on what will change. Feel free to consider new technologies such as self-driving vehicles, drones, 3D printers, and robots on how they might change the future of supply chain management and acquisition. Note that the government is considering some of these new technologies and trying to use these technologies for efficiencies in the future.

Write a two-page paper, plus the title page and a reference page.

As always, read all the lesson notes in Week 3 before you start this assignment as new or current events may have been updated since the start of class.

Instructions:

- Written communication: Written communication is free of errors that detract from the overall message.
- APA formatting: Resources and citations are formatted according to APA style and formatting.
- Length of paper: typed, double-spaced pages with no less than a two-page paper.
- Font and font size: Times New Roman, 12 point.
