View Report Summary

2 Background The patient in our case is Mrs Maria Perez, who is a 53-year-old Puerto Rican. Mrs Perez confesses that she has an embarrassing problem. On further discussions with her, she says that she has an alcohol addiction. According to her, her reliance on alcohol started soon after her father's death when she was still a teenager. 3 She also says that she has been in and out of Alcoholics Anonymous meetings because of her alcohol addiction for the past 25 years. She also says that it is becoming more and more difficult for her to stay sober. In recent years a casino has been opened in her neighborhood, which has led to her developing a gambling habit. According to Mrs Perez, her gambling addiction is such that she gets a high from gambling. 4 When she is gambling, she also takes alcohol. 5 She also admits that her consumption of cigarettes has also increased over the past two years. 4 She is alive to the effects that smoking could potentially have on her health. She also says that despite making attempts to stop drinking, she feels the need to drink whenever she gambles to even out the high she gets Mrs Perez says that her usual
