

Instruction: For the case and reading analysis, each of the reports must be typed within one-page, respectively (double-spaced, around 300 words, 23 lines by using Times New Roman, font 12, with 1 inch margin on each side). For the calculation questions, you must type or write as legibly as possible. In addition, as we do in class, you must show the major steps and keep the 4th decimal place during the calculation process and 2nd decimal (e.g., 43.65%, \$21.09) for the final answer (if available). Finally, the assignment is due at Session 7 and any late submission will result in at least 25% deduction in the score.
