

## Homework Assignment #6

**DUE: Sept. 30th, 11:59 pm**

1. To complete this homework, start on page 248 of your text book, section 6.5 and continue through page 252, section 6.6.
2. After creating the blocks outlined in step 1 (shown in figures 6-7b & 6-8c), create several different layout sizes that will use these blocks. In **one file** adjust the page size on five different layouts to these sizes: 8.5"x11", 11"x17", 18"x24", 30"x42", and 36"x48". Then insert the titleblocks from step 1 in the bottom right corner. They should then be scaled up to be roughly 1/6 to 1/8 of the page height.
3. Create a logo block representing you or your company and place it in the bottom left corner of each layout.
4. This assignment should be turned in as one drawing file with five layouts and a different size titleblock/sheet size on each layout tab. Below is an example of what should be on each layout.
