

300-①

In - Class Group Activity

MIS 300 - MIS 301

October 2, 2013

General Instructions: I will need only one copy of this back, but am making enough so everybody can have one. Each team member present should sign the back of the copy to be handed in. That is the way I will take attendance today.

1. List the name and responsibility (title, area supervised, and so on) of the person you intend to interview for your project.

Greg Bierly, Director University Honors Program (812) 237-3225
8 am - 4:30 pm

2. Write at least three open ended questions (refer to your book if you need to) you would ask in order to help you understand what goes on in the area you intend to explore and use as the basis for your project.

a) What are the requirements to get into the honors program?
and how is a student selected?

b) Once a student is selected how is that person
matched with classes, and advisors? Majors + Honors?

c) After beginning the honors program how is the
student's progress tracked?

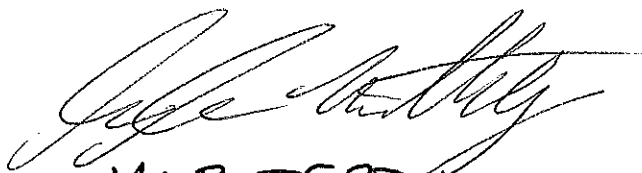

3. Now write three closed-ended questions for the same purpose.

d) How many people are staffed in the department?

e) What software is used?

f) How many honors courses/programs are there?

g) Are there different levels of honors course/programs?
