▪ Total Points: ▪ Comments:	_____/10

HERS 291: Prevention and Care of Athletic Injuries
Extra Credit Paper

Name _____

Choose One of the Following Questions:

Given the current climate in sports today, what do you believe is the single biggest factor to blame for the epidemic of concussions being sustained?

Do you believe that collegiate athletic departments should be required to perform an Electrocardiogram (ECG) on every athlete to determine whether or not they have a heart arrhythmia that may predispose them to sudden cardiac death? ✓

If you were asked by a client/patient/athlete what your opinion is on the best graft option for an ACL reconstruction, which type would you encourage them to consider?

Kinesio® Tape is becoming more popular and visible throughout the athletic population. Based on the research, do you believe that this is an effective form of treatment or merely a fad?

Due Date: Friday, April 25th @ 5:00pm
