

Name: HAZARD

Subculture Questions ((biker culture)).

(Keeping club anonymous)

1-When did the person start begin a part of biker culture?

Got My First Harley when I was 18, but My Grandpa built bikes and Trikes My whole life. I joined an MC. When I moved to Chico.

2-How did you feel after joining this group?

It was always sort of a part of who I was anyway, just felt right to put the cut on.

3-How does the community at large feel about this biker culture?

Like most groups I'd say pretty mixed reviews. A lot of people are scared of bikers, some find them obnoxious. It depends on the person I guess.

4-What made you get into this culture? What prompted you?

Like I said before I always kind of was, but what prompted me to actually join a club I guess, was I just found the right one.

5-What is it like to be a day in the life of you or your culture?

Like anyone else except maybe more parties and being hassled by the cops. Oh and a lot of riding.

6-What is so significant about your culture?

We actually do a lot of charity work and we do what we can for the community. Like right now we are trying to get a petition going to change a stop light on Mangrove that has caused multiple accidents.

7-What do you like/ What don't like about your culture?

I couldn't say everything I liked about it, but in short, every other patch holder is like a brother, and if I needed it they would give me the shirt off their back and vice-versa. I don't like that police and some general public treat us like criminals and gangsters. Clubs are NOT Gangs.
