Economics 215
Writing assignment #2
Fall 2014

Many economists would like to establish a market in which human kidneys for transplant can be bought and sold. Use a demand and supply graph to illustrate how such a market could be beneficial and discuss. The article at: http://faculty.winthrop.edu/stonebrakerr/book/hearts.htm should be helpful. I have put a link to that article at the top of the course web page.

The assignment is due in class on Monday, October 13! It should be less than one page in length and may be either hand-written (legibly) or typed.
