INFS 6710
11-24 Assignment

Date Due: Monday, November 24, 2014 (6:00 PM)

(Written Assignment – 5 points)

Instructions

1. Read an article from an information systems journal (or from Project Management Journal) that addresses virtual teams in information systems projects published between the years of 2008-2014. (Email the article citation if it is unclear if these requirements are met.)
 2. Prepare a one page, double spaced, write up that includes the following.
 - Use the heading – **Summary**
Briefly summarize the article in your own words. * This should be about 2-3 sentences at most.
 - Use the heading – **Analysis**
This is weighted heavier in terms of your grade. This should be an analysis that goes beyond what the authors report. * (This should be more than “I agree” or “I disagree” with the authors’ findings.)
 3. Cite the article at the top of the page using APA style. (Research APA style guidelines.)
- * If you use direct quotes, use them sparingly. For future reference, direct quotes must be in quotation marks or indented depending on the length. Your answers should be thorough, carefully thought out, and properly edited. They will be graded on content, delivery, and adherence to instructions.
