

thought was to search about Jessie and work with him in meth business. I know that from this business I can gain a quite large amount of money that allow me to develop sufficient inheritance for my family before I die and at the same time to pay the cancer treatment. I know that this idea was very bad, but I want to work in this business in a good intension and I will do everything to help my family. Anyway Jessie helped me entering the meth business. We started our work in a RV in the middle of the desert using my chemistry knowledge and Jessie's relations with drugs additives that profit him to be the dealer of my meth. The business became bigger and bigger. I had become famous in my region under a covered name (Heisenberg) because of my perfect blue crystal meth. My name reached everywhere in the region. My second stage in my life when my name and my work reached Gustavo who was the leader of the most dangerous gang in the region. He offered me the best offer ever. He offered me to get 500,000 dollar weekly. I think that that quite enough for my plan. My only condition was to have Jessie work with me as an assistant. Their work was very professional and completely secured. At the same time my family noticed the disease on me, I told them that I am under treatment and my old friend Elliot is paying for it to keep any suspension away. Everything was going perfect till Skyler decide to thank Gretchen (Elliot wife) of what they are doing with us. She know from there that I was not honest with her. That's was the start of my family problems. I tried to be honest with her, and her reaction was to divorce. I told her the truth and my desire from this business, but she was convinced on her decision. The perfect solution was to break up with her. In addition, at that time we were just got a new daughter. I was very sad because of this problem. My all concern was to make my family happy, but my wife are not understanding it. She kept our subject as secret between us from my brother in law (the DEA agent) and her sister. However, my treatment was going positive and my finance balance was more than my need. Skyler wanted to be away from me, but at the same time
